Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Cover; CONTENTS; Editorial advisory board; Editorial; Coordinated action in reverse distribution systems; A framework for purchasing transport services in small and medium size enterprises; Towards a theoretical foundation of supply network interdependence and technology-enabled coordination strategies; Logistics and financial performance; Call for papers
Sommario/riassunto	This e-book contains two papers from the 19th NOFOMA (Nordic Logistics Research Network) conference, arranged by the University of Iceland in Reykjavik, Iceland, in June 2007. The last two articles in this issue were submitted directly to the journal and were not part of the NOFOMA conference. The articles herein make a substantial contribution to our understanding of a wide range of highly relevant logistics and supply chain issues.

Sommario/riassunto	Herausgegeben im Auftrag des Auswärtigen Amts vom Institut für

Zeitgeschichte. Hauptherausgeber: Hans-Peter Schwarz, Mitherausgeber: Helga Haftendorn, Klaus Hildebrand, Werner Link, Horst Möller und Rudolf Morsey. Wissenschaftliche Leiterin: Ilse Dorothee Pautsch. 1973 konnten die Bemühungen Bonns um eine Regelung der Beziehungen zu den östlichen Nachbarn durch Verträge mit der CSSR, Bulgarien und Ungarn erfolgreich abgeschlossen werden. Gleichzeitig begann für die Bundesrepublik durch den Beitritt zur UNO und die Teilnahme an der KSZE eine neue Phase der Multilateralisierung ihrer Außenpolitik. Weitere thematische Schwerpunkte der 426 erstmals veröffentlichten Dokumente sind die MBFR-Verhandlungen in Wien, der Besuch von Leonid Breschnew in Bonn und der Vorschlag Henry Kissingers, im Rahmen eines "Year of Europe" die westliche Wertegemeinschaft in einer transatlantischen Erklärung zu bekräftigen. Der Jom-Kippur-Krieg im Oktober und die sich anschließende Ölkrise zeigten die Grenzen der Entspannung auf und stellten die europäischen Staaten vor neue Herausforderungen.

Sommario/riassunto	Guidelines for establishing criteria for application, performance, interchangeability, tests, life cycle costs, and safety requirements of traction power rectifier transformers are established in this standard.

Set forth are the electrical, mechanical and thermal design, manufacturing, and testing requirements for traction power rectifier transformers for dc electrification systems. Covered in this standard are liquid-immersed and dry-type transformers, including those with cast coil and epoxy resin encapsulated windings.

Nota di contenuto	Introduction to the Primer -- Glossary of Terms -- Cardiac and Respiratory Responses to Exercise in Health and Disease -- Conducting a Cardiopulmonary Exercise Test -- Interpreting Results of the Cardiopulmonary Exercise Test -- Sample Cases Demonstrating Basic Patterns of Exercise Limitation -- Self-Assessment Cases. .
Sommario/riassunto	Cardiopulmonary exercise testing is an important diagnostic test in pulmonary medicine and cardiology. Capable of providing significantly more information about an individual's exercise capacity than standard exercise treadmill or 6-minute walk tests, the test is used for a variety of purposes including evaluating patients with unexplained exercise limitation or dyspnea on exertion, monitoring disease progression or response to treatment, determining fitness to undergo various surgical procedures and monitoring the effects of training in highly fit

athletes. Introduction to Cardiopulmonary Exercise Testing is a unique new text that is ideal for trainees. It is presented in a clear, concise and easy-to-follow manner and is capable of being read in a much shorter time than the available texts on this topic. Chapters describe the basic physiologic responses observed during sustained exercise and explain how to perform and interpret these studies. The utility of the resource is further enhanced by several sections of actual patient cases, which provide opportunities to begin developing test interpretation skills. Given the widespread use of cardiopulmonary exercise testing in clinical practice, trainees in pulmonary and critical care medicine, cardiology, sports medicine, exercise physiology, and occasionally internal medicine, will find Introduction to Cardiopulmonary Exercise Testing to be an essential and one of a kind reference.
