Sommario/riassunto	Violence in schools has more potential to involve large numbers of students, produce injuries, disrupt instructional time, and cause property damage than any other form of youth violence. Burning Dislike is the first book to use direct observation of everyday violent interactions to explore ethnic conflict in high schools. Why do young people engage in violence while in school? What is it about ethnicity that leads to fights? Through the use of two direct observational studies conducted twenty-six years apart, Martín Sánchez-Jankowski documents the process of ethnic school violence from start to finish. In addition to shedding light on what causes this type of violence and how

it progresses over time, Burning Dislike provides strategic policy suggestions to address this troubling phenomenon.

Sommario/riassunto	This book presents more than 600 eye-catching structural geological photographs and explanatory descriptions, from different Indian terrains. This book will enable easy identification of deformation features, one of the most important tasks in structural geology at the meso- and micro-scales. The book focuses on ductile and brittle shear sense indicators. This book suits for the undergraduate and graduate geoscience students. The book will be of considerable interest to tectonicians and structural geologists, given the enormous international importance of Indian terrains for exploration and other purposes.
