1. Record Nr.	UNINA9910739446603321
Titolo	The Bethesda System for Reporting Thyroid Cytopathology : Definitions, Criteria, and Explanatory Notes / / edited by Syed Z. Ali, Edmund S. Cibas
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2018
ISBN	3-319-60570-4
Edizione	[2nd ed. 2018.]
Descrizione fisica	1 online resource (XV, 236 p. 224 illus. in color.)
Disciplina	616.07
Soggetti	Pathology Endocrinology Cancer - Surgery Surgical Oncology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Overview of Diagnostic Terminology and Reporting -- Nondiagnostic/Unsatisfactory -- Benign -- Atypia of Undetermined Significance/Follicular Lesion of Undetermined Significance -- Follicular Neoplasm/Suspicious for a Follicular Neoplasm -- Follicular Neoplasm, Hürthle Cell (Oncocytic) Type/Suspicious for a Follicular Neoplasm, Hürthle Cell (Oncocytic) Type -- Suspicious for Malignancy -- Papillary Thyroid Carcinoma, Variants, and Related Tumors -- Medullary Thyroid Carcinoma -- Poorly Differentiated Thyroid Carcinoma -- Undifferentiated (Anaplastic) Carcinoma and Squamous Cell Carcinoma of the Thyroid -- Metastatic Tumors, Lymphomas, and Rare Tumors of the Thyroid.
Sommario/riassunto	The first edition of The Bethesda System for Reporting Thyroid Cytopathology was published in 2010 and has greatly influenced the practice of thyroid cytopathology. The terminology proposed and illustrated in this text has been widely adopted not only in the U.S. but also abroad. It has become an essential text for pathology trainees and practicing pathologists examining thyroid fine needle aspiration (FNA) specimens. Since 2010, there have been a number of important advances in the management of patients with nodular thyroid disease

and in the understanding of the biology of thyroid cancer. This new edition includes these advances that impact terminology for reporting thyroid cytopathology. In particular, it incorporates a discussion of the recently implemented and now widespread use of molecular testing of thyroid FNA samples, which has transformed the management of patients with nodular thyroid disease in the U.S.. In addition, this edition accommodates the recent changes to the classification of thyroid cancer, most notably the introduction of a new thyroid diagnosis, that of "non-invasive follicular tumor with papillary-like nuclear features (NIFTP)". Thoroughly revised and updated, The Bethesda System for Reporting Thyroid Cytopathology, Second Edition will provide the reader with a unified approach to diagnosing and reporting thyroid FNA interpretations. It serves as a reference guide not just for pathologists, but also endocrinologists, surgeons, and radiologists.
