

1. Record Nr.	UNINA9910739470403321
Titolo	Extraterrestrial Altruism [[electronic resource]] : Evolution and Ethics in the Cosmos // edited by Douglas A. Vakoch
Pubbl/distr/stampa	Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer, , 2014
ISBN	3-642-37750-5
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (325 p.)
Collana	The Frontiers Collection, , 1612-3018
Disciplina	170.44
Soggetti	Astrobiology Ethics Planetology Cross-cultural psychology Communication Cross Cultural Psychology Communication Studies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cosmic Evolution, Reciprocity, and Interstellar Tit for Tat -- Extraterrestrial Intelligence: Friends, Foes, or Just Curious? -- Eliciting Altruism While Avoiding Xenophobia: A Thought Experiment -- Predator – Prey Models and Contact Considerations -- Harmful ETI Hypothesis Denied: Visiting ETIs Likely Altruists -- Altruism Toward Non-Humans: Lessons for Interstellar Communication -- Caring Capacity and Cosmocultural Evolution: Potential Mechanisms for Advanced Altruism -- The Precautionary Principle: Egoism, Altruism, and the Active SETI Debate -- The Accidental Altruist: Inferring Altruism from an Extraterrestrial Signal -- Interstellar Intersubjectivity: The Significance of Shared Cognition for Communication, Empathy, and Altruism in Space -- Other Minds, Empathy, and Interstellar Communication -- Interspecies Altruism: Learning from Species on Earth -- Terrestrial and Extraterrestrial Altruism -- Kenotic Ethics and SETI: A Present-day View -- Altruism, Metalaw, and Celestistics: An Extraterrestrial Perspective on Universal Law-Making -- A Logic-Based

Approach to Characterizing Altruism in Interstellar Messages -- Equity and Democracy: Seeking the Common Good as a Common Ground for Interstellar Communication -- Patterns of Extraterrestrial Culture -- Evolutionary Perspectives on Interstellar Communication: Images of Altruism. .

Sommario/riassunto

Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence (SETI): that extraterrestrials will be transmitting messages to us for our benefit. This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact. Should we expect altruism to evolve throughout the cosmos, or is this only wishful thinking? Would this make biological sense? Is it dangerous to send messages to other worlds, as Stephen Hawking has suggested? Would extraterrestrial societies be based on different ethical principles? Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth, providing new insights that are critical for SETI. Chapters are authored by leading scholars from diverse disciplines—anthropology, astronomy, biology, chemistry, computer science, cosmology, engineering, history of science, law, philosophy, psychology, public policy, and sociology. The book is carefully edited by Douglas Vakoch, Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies. The Foreword is by Frank Drake. This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth, or whether they are built into the fabric of the universe.
