Nota di contenuto	Directional verbs in modern Cantonese. A typological perspective -- Directional verbs in modern Chinese dialects. A synchronic perspective -- Directional verbs in early Chinese dialects. A diachronic perspective -- Conclusion.
Sommario/riassunto	This comprehensive study concentrates particularly on the use of a closed set of motion verbs in five of the major dialects, including Mandarin, Wu, Hakka, M?n and Cantonese. The author shows that these dialects form a continuum with some exhibiting more characteristics of a verb-framed language than the others. The phenomenon reflects the various stages of typological transformation and grammaticalization that the dialects have undergone.
