

1. Record Nr.	UNINA9910741137203321
Autore	Müller Matthias otto
Titolo	Diffusion dynamics of energy-efficient renovations : causalities and policy recommendations // Matthias Otto Muller
Pubbl/distr/stampa	New York : , : Springer, , 2013
ISBN	3-642-37175-2
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (xiv, 342 pages) : illustrations (some color)
Collana	Lecture Notes in Energy, , 2195-1284 ; ; 14
Disciplina	333.7916
Soggetti	Architecture and energy conservation Buildings - Energy consumption
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"ISSN: 2195-1284."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Introduction -- Research Design and Methods -- Climate Change, Energy Use Patterns and the Stock of Buildings -- A Small Model for the Analysis of the Transformation of the Stock of Buildings -- Actors in the Societal Problem Situation -- A Feedback Perspective on the Diffusion of Energy-Efficient -- A Rich Model of the Diffusion Dynamics of Energy-Efficient -- Transformation of the Societal Problem Situation -- Discussion and Conclusions -- Materials Published in the Electronic Supplements -- Model Testing -- A Fictitious Example of the Immobility Business Model -- Glossary.
Sommario/riassunto	Accelerating the diffusion of energy-efficient renovations is a key policy lever in order to reduce the environmental impact of buildings. This book provides a broad, systemic perspective on the causes of the diffusion of energy-efficient renovations in Switzerland and policy recommendations for accelerating the diffusion process. Specifically, the book provides a description of the societal problem situation within which the diffusion process takes place and an analysis of the actors involved. It provides a detailed explanation of the causes of the diffusion process that synthesizes insights from the engineering, economics, marketing, sociology, communication studies and political science literature. It employs the System Dynamics methodology to simulate the diffusion process and analyze policy levers. The book proposes two regulations and a sketch of a business model as particularly promising public policy interventions. It concludes with an

outline of a generic theory of the diffusion of sustainable technologies. .
