Globalization today: incomplete, distorted and unfair -- Chapter 25. The impact of the global crisis on transition economies -- Chapter 26. The European Social Model: Is there a Third Way? -- Chapter 27. Seismic faults in the European Union.</p> |
| Sommario/riassunto | <p>This book, the second of two volumes, brings together the work of Domenico Mario Nuti to highlight his significant and varied contribution to economics. Bringing together works from across Nuti's career, his distinctive intellectual framework is exemplified in relation to discussions on the drivers of economic growth and development, the most efficient economic system, the organisation of firms, and how economies should be managed. This volume gives particular attention to Nuti's views about how economic systems evolve, about the possibilities for various forms of economic democracy; and his analysis of East-West integration and globalization. The volume also contains a bibliography of his works. Domenico Mario Nuti was Professor of Economics at La Sapienza University in Rome and the European University Institute in Florence. He also held positions at the University of Cambridge, University of Birmingham, and the London Business School. Saul Estrin is Emeritus Professor of Managerial Economics and Strategy at LSE. Milica Uvalic is Professor of Economics at the University of Perugia.</p> |
