

1. Record Nr.	UNINA9910741160103321
Autore	Scholz Fritz
Titolo	Chemical Equilibria in Analytical Chemistry : The Theory of Acid–Base, Complex, Precipitation and Redox Equilibria // by Fritz Scholz, Heike Kahlert
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-17180-9
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (VII, 251 p. 155 illus., 86 illus. in color.)
Disciplina	541.392
Soggetti	Analytical chemistry Environmental chemistry Biochemistry Pharmaceutical technology Physical chemistry Analytical Chemistry Environmental Chemistry Biochemistry, general Pharmaceutical Sciences/Technology Physical Chemistry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- The chemical equilibrium -- Acid-base equilibria -- Complex formation equilibria -- Solubility equilibria -- Redox equilibria -- Titrations.
Sommario/riassunto	This book provides a modern and easy-to-understand introduction to the chemical equilibria in solutions. It focuses on aqueous solutions, but also addresses non-aqueous solutions, covering acid–base, complex, precipitation and redox equilibria. The theory behind these and the resulting knowledge for experimental work build the foundations of analytical chemistry. They are also of essential importance for all solution reactions in environmental chemistry, biochemistry and geochemistry as well as pharmaceutics and medicine.

Each chapter and section highlights the main aspects, providing examples in separate boxes. Questions and answers are included to facilitate understanding, while the numerous literature references allow students to easily expand their studies.
