

1. Record Nr.	UNINA9910741165703321
Autore	Fleury Pierre
Titolo	Gravitation : From Newton to Einstein // by Pierre Fleury
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2019
ISBN	3-030-32001-4
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (XII, 120 p. 52 illus., 10 illus. in color.)
Collana	SpringerBriefs in Physics, , 2191-5423
Disciplina	530.1
Soggetti	Gravitation Mechanics Classical and Quantum Gravitation, Relativity Theory Classical Mechanics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Newton's physics -- Einstein's theory of relativity -- The general-relativistic world.
Sommario/riassunto	This primer proposes a journey from Newton's dynamics to Einstein's relativity. It constitutes a pedagogical, rigorous, and self-contained introduction to the concepts and mathematical formulation of gravitational physics. In particular, much attention is devoted to exploring and applying the basic tools of differential geometry, that is the language of general relativity. Real-world manifestations of relativity, such as time dilation, gravitational waves, and black holes, are also discussed in detail. This book is designed for third-year bachelor or first-year master students in theoretical physics, who are already familiar with Newton's physics, possibly had an introductory course on special relativity, and who are seeking to learn general relativity on a firm basis.
