Sommario/riassunto

South Dakota was the first state in the nation's history to adopt the Initiative and Referendum, making it permissible for the people to initiate a constitutional amendment, on a statewide level in 1898. While it continues to be a controversial procedure, Patrick Garry discusses this in depth while providing the only definitive reference resource on the South Dakota Constitution, including all significant court decisions interpreting each Section.

Chapter 6: Diversity in Social Systems -- Chapter 7: Diversity in Culture and Customs -- Chapter 8: Diversity in Fairs and Festivals -- Chapter 9: Diversity in all Walks of Life -- Chapter 10: Conclusions.
Sommario/riassunto	The Himalaya is the new folded mountain system – the tallest and the youngest in the world. It has a rich diversity – natural and cultural, and diversity in all walks of life. Most of its uniqueness is unknown because of its remoteness. Even, the native people are not aware of them. This book aims to describe the uniqueness of the Central Himalaya in terms of its natural and cultural diversity in detail. Supported by original figures and primary data, this book is empirically tested. It is mainly

based on observation and participation and the use of a qualitative approach. Although lots of work has been carried out on the various aspects of the Himalayan region yet, a detailed description of the natural and cultural diversity is yet to be done. This book steps forward to elaborate on some of the unique natural and cultural features of the Central Himalaya, which are worthy to be known about. It contains a total of 10 chapters. Four chapters are devoted to natural diversity and four chapters comprise cultural diversity. Besides, the introduction and conclusions are the first and the last chapters of the book, respectively. The book is the first of its kind and will be useful to all stakeholders – students of all standards, research scholars, academicians, policymakers, native people, tourists, and the general public.
