	Autore	Greenwood Dan
	Titolo	Effective governance and the political economy of coordination / / Dan Greenwood
	Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2023
	ISBN	3-031-30383-0
	Edizione	[1st ed. 2023.]
	Descrizione fisica	1 online resource (308 pages)
	Disciplina	352.35
	Soggetti	Government accountability Interagency coordination Political planning Political science
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Governance, markets and institutional analysis -- Chapter 3. The challenge of coordination -- Chapter 4. Policy goals and knowledge -- Chapter 5. Coordination beyond the market -- Chapter 6. Scales of governance -- Chapter 7. Evaluating coordinative effectiveness -- Chapter 8. Case studies and Conclusion.
	Sommario/riassunto	"This is an extremely valuable and rare contribution to debates about effective governance structures. It provides a well-balanced though critical assessment of arguments about the qualities of different governance arrangements that properly engages all sides and perspectives." – Mark Pennington, Professor of Political Economy and Public Policy, King's College London, UK "Dan Greenwood's Effective Governance and the Political Economy of Coordination brings together a variety of perspectives in political science and political economy in order to develop a novel approach to thinking about problems of governance. His emphasis on openness, discovery, and learning is an important and welcome reminder of how governance systems can be improved when we don't shy away from the challenges associated with using policy to solve complex problems." – Jayme Lemke, Senior Research Fellow, Mercatus Centre, George Mason University, USA This

book provides a conceptual and methodological approach for researchers evaluating governance and policy in the face of complexity, and demonstrates the application of this approach across different governance and policy contexts. It fills a significant gap in the literature on governance, and proposes a theoretical focus on coordination to enable the assessment of multi-tier, cross-sector governance institutions and policy. It also introduces a range of applications for the proposed approach, including two case studies of governance and policy for the built environment and health services. The book introduces, analyses and draws from a range of perspectives in political economy, political science, policy analysis and evaluation. It also engages with longstanding debates in political economy about states and markets, which are largely overlooked by political science analyses of coordination challenges in governance. The book will appeal to scholars and students of governance, public policy and political science. Dan Greenwood is Reader in Politics at the Centre for the Study of Democracy, University of Westminster, UK. His research focuses on policy analysis, governance evaluation and political economy.
