Sommario/riassunto	This book, focusing on urban migration and public governance, reviews on the concepts and theories of urban migration and urban governance across the globe and sums up world migration trends and policy changes, coupled with the characteristics and types of China's urban migration. What differs this book from other books is that it probes into the main factors and mechanisms influencing urban migration and inclusion, and that it adopts Shanghai as a sample and capitalizes on Shanghai's urban migration data to verify the subjective and objective reasons affecting urban migrants' inclusion. Moreover, this book takes a further step to conduct a theoretical reflection from the perspectives of population migration and migration policies and explores current dilemmas facing China in terms of urban migration management and possible ways to make a difference. In the final part, this book puts forward some theory-based and practicable countermeasures to transform urban migration governance in China.
