The Short Cycles of Labour Market Operation and Industrial Relations in Interwar Romania -- 27. Urbanization and the crisis of natural resources, in the context of sustainable development.

Sommario/riassunto

This book presents economic research on global paradigm shifts after the COVID-19 crisis. It explores some expected deep and long-lasting changes that are building up a “new normal”. Featuring select contributions presented at the 2021 International Conference of Economic Scientific Research - Theoretical, Empirical and Practical Approaches (ESPERA), this book explores topics such as digitalization and digital sovereignty, workforce management, virtual training, digital currency, de-carbonization in production processes, supply chains, cybersecurity, automation, artificial intelligence, machine learning, Internet of Things and blockchain technologies.
