Discursive change in the principle of common but differentiated responsibilities -- Chapter 5. Framing Climate Change Resilience in China -- Chapter 6. Conclusion: Post-COVID 19 climate governance.
Sommario/riassunto	This book focuses on the politics, discourse and actors surrounding climate change issues in China. This framework offers a new way of observing Chinese discourses around climate change. Discursive changes in coal consumption and air pollution have been raised to uncover the various motivations of China towards addressing climate issues. This book will be of interest to a variety of different stakeholders including policy-makers, non-state actors, business

communities and media, and anyone who are interested in the climate governance of China. Sidan Wang is Lecturer at the Institute of International Relations of China Foreign Affairs University in Beijing.
