Sommario/riassunto

This innovative work of historical anthropology explores how India's Dalits, or ex-untouchables, transformed themselves from stigmatized subjects into citizens. Anupama Rao's account challenges standard thinking on caste as either a vestige of precolonial society or an artifact of colonial governance. Focusing on western India in the colonial and postcolonial periods, she shines a light on South Asian historiography and on ongoing caste discrimination, to show how persons without rights came to possess them and how Dalit struggles led to the transformation of such terms of colonial liberalism as rights, equality, and personhood. Extending into the present, the ethnographic analyses of *The Caste Question* reveal the dynamics of an Indian democracy distinguished not by overcoming caste, but by new forms of violence and new means of regulating caste.

3. Record Nr.	UNINA9910346847403321
Autore	Vandenplas Yvan
Titolo	Probiotics and Prebiotics in Pediatrics / Yvan Vandenplas, Francesco Savino
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019 Basel, Switzerland : , : MDPI, , 2019
ISBN	9783038979517 3038979511
Descrizione fisica	1 electronic resource (258 p.)
Soggetti	Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	The goal of this Special Issue, "Probiotics and Prebiotics in Pediatrics", is to focus on the importance of pediatric nutrition with probiotics and prebiotics to improve gastrointestinal health in newborn, infants, and children. Specifically, the aim is to clarify if probiotics and prebiotics can influence gut microbiota composition and host-interaction favoring human health and preventing diseases. This new information will provide health care professionals with a widespread, clear and update evidence on probiotics and prebiotics and intestinal gut microbiota in pediatric care.

4. Record Nr.	UNINA9910743269903321
Titolo	Glutathione: Chemistry and Biochemistry
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2023
Descrizione fisica	1 online resource (212 p.)
Soggetti	Biology, life sciences Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>It has been known that cellular glutathione content and its speciation play a role, among others, in redox homeostasis, cell cycle control, immunological defense, and pathological abnormalities. Furthermore, it plays a significant role in the biotransformation of drugs and other endogenous or exogenous electrophilic species. Most of these cellular functions are related to the thiol function of the cysteine moiety. This reprint presents the publications that appeared in the Special Issue of Molecules, "Glutathione: Chemistry and Biochemistry." The first three contributions review the present-day knowledge of the GSH/GSSG system and the most important GSH-related proteins involved in regulating various cellular events. The subsequent four contributions present selected interventions that modulate the GSSG/2GSH system. One of the contributions to this session describes a new HPLC method to quantify the reduced and oxidized glutathione levels. The third session involves three contributions demonstrating the role of GSH in the metabolism of different candidate and clinically used anticancer drugs. One of the contributions, a theoretical work, provides helpful information for developing GSH analogs with high ACE inhibitor activity. By purpose and content, this Special Issue is addressed to the vast number of life science researchers (academic and industrial) and medical professionals who are interested in or already engaged in research that involves glutathione.</p>
