

1. Record Nr.	UNINA9910743271503321
Titolo	Developing Temperature-Resilient Plants: Responses and Mitigation Strategies
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2023
Descrizione fisica	1 online resource (402 p.)
Soggetti	Biology, life sciences Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Climate-change-induced extreme temperatures significantly impact crop production worldwide. Therefore, this Special Issue highlights several genetics, genomics, agronomic and physiological interventions in developing temperature-resilient plants.
