

1. Record Nr.	UNINA9910743273303321
Autore	Haghbakhsh Reza
Titolo	Recent Advances in Green Solvents
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2023
Descrizione fisica	1 online resource (194 p.)
Soggetti	Chemistry Research & information: general Research and information: general
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	"Green chemistry", as a rather novel field of chemistry and chemical engineering, is one of the key routes to assist researchers in sustainable development. Among the most valuable assets of green chemistry, "green solvents" are primary candidates to replace the industry workhorses, i.e., conventional harmful solvents.
