Sommario/riassunto

This book brings together a collection of chapters that investigate sustainable tourism development in different Asian contexts; from stakeholders' perspectives, existing issues in the market, as well as the impacts of COVID-19 on tourism. It highlights the importance of tourism sustainability in Asia. Specifically, this book examines these themes by examples related to Asian tourism such as; social-cultural impact of sustainable growth, environmental constraints and policies, community engagement, moral limits of the market, stakeholders' participation in tourism development, the hindered interaction between foreign tourists and local community, impact of the pandemic and proposed ways forward. This edited volume substantiates this by using evidence of quantitative, qualitative and mixed methods approaches aligned with empirical data to show sustainable efforts and impacts. This book is of interest to researchers and practitioners as it offers timely understandings of sustainable tourism from multiple perspectives within the Asian context.
