	Sommario/riassunto	In this close reading of a text central to the story of David, the author, using the tools of linguistic pragmatics and poetics, exposes the text's promotion of a prophetic-based ideology, through a polemical rhetoric

that polarizes David and Yahweh around the opposed notions of king (melek) and leader (nagid). He then goes on to analyse the context, in ancient Near Eastern royal ideology and in Samuel, for how the text develops this opposition, and finally reflects on its promulgation of the supreme mediacy of the prophetic word.

Sommario/riassunto	This open access book constitutes the proceedings of the 8th International Joint Conference on Electronic Voting held in Luxemburg in October 2023. The conference collected the most relevant debates on the development of Electronic Voting, from aspects relating to security and usability through to practical experiences and applications of voting systems, also including legal, social, or political aspects, amongst others. The 9 full papers presented were carefully reviewed and selected from 38 submissions. The selected papers cover a wide range of topics connected with electronic voting, including experiences and revisions of the actual uses of E-voting systems and corresponding processes in elections.
