

1. Record Nr.	UNINA9910746069203321
Titolo	Sustainable Energy and Technological Advancements : Proceedings of ISSETA 2023 // Gayadhar Panda, Hassan Haes Alhelou, and Ritula Thakur, editors
Pubbl/distr/stampa	Singapore : , : Springer, , [2023] ©2023
ISBN	981-9941-75-X
Edizione	[First edition.]
Descrizione fisica	1 online resource (671 pages)
Collana	Advances in Sustainability Science and Technology Series
Disciplina	621.319
Soggetti	Electric power distribution Renewable energy sources
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Committee Members -- List of Reviewers -- Preface -- Contents -- About the Editors -- 1 Control of PMSM Drive Using Lookup Table-Based Compensated Duty Ratio Optimized Direct Torque Control (DTC) -- 1 Introduction -- 2 Mathematical Model of PMSM and Method -- 2.1 PMSM Model -- 2.2 Duty Ration Determination Method -- 2.3 Analysis of Ripple Reduction -- 3 Overview of Three-Phase OEW PMSM -- 4 Simulation Result and Discussion -- 5 Experimental Verifications -- 6 Conclusion -- References -- 2 An Optimal Sizing of a Three-Phase PMSM Based on Volume, Cogging Torque and Power Loss Minimization -- 1 Introduction -- 2 Formulation of the Objective Function -- 3 Optimal Design and Result -- 4 Physical Arrangement of the Designed Motor -- 5 Conclusion -- References -- 3 MPC-Based Frequency Regulation for Shipboard Microgrid -- 1 Introduction -- 2 Modeling of Shipboard Microgrid -- 2.1 Solar Turbine with Interconnecting Devices -- 2.2 Wind Turbine -- 2.3 Sea Wave Energy -- 2.4 Fuel Cell -- 2.5 Flywheel Energy Storage Devices -- 2.6 Battery Energy Storage Devices -- 2.7 Shipboard Modeling -- 3 Controller Design Methodology -- 4 Result and Discussions -- 5 Conclusions -- References -- 4 Voltage Instability Detection and Adaptive Reactive Power Compensation Using L-Index -- 1 Introduction -- 2 Mathematcal Formulaton of Voltage

Stably Index (L-Index) -- 3 Results and Discussion -- 4 Conclusion -- References -- 5 A Review on Developments and Applications of Fractional-Order Kalman Filter -- 1 Introduction -- 2 Developments of Fractional-Order Kalman Filter -- 3 Applications of Fractional-Order Kalman Filter -- 3.1 Battery Management System -- 3.2 Weather System -- 3.3 Network System -- 3.4 Energy Systems -- 3.5 Stochastic State Space Systems -- 3.6 Physical Systems -- 3.7 Linear and Nonlinear Fractional-Order Systems -- 4 Conclusions -- References.

6 Probabilistic Load Flow Study Considering Fuzzy Logic-Based Contingency Sequencing for Network Outages -- 1 Introduction -- 2 Contingency Analysis Using PI -- 3 Contingency Analysis Using Fuzzy Approach -- 4 Cumulant Method (CM) for PLF Formulations -- 4.1 Fundamental CM for Independent Variables -- 4.2 Modified CM for Correlated Variables -- 5 Probabilistic Modeling of Uncertain Parameters -- 5.1 Load -- 5.2 Conventional Generator (CoG) -- 5.3 Transmission Line -- 6 Case Study -- 7 Conclusion -- References -- 7

Reconfiguration of Power Distribution Network for Improvement of System Performance: A Critical Review -- 1 Introduction -- 2 Distribution Network Reconfiguration (DNRC) -- 2.1 Single-Objective Distribution Network Reconfiguration -- 2.2 Multi-objective Distribution Network Reconfiguration -- 3 Various Methodologies Considered for Distribution Network Reconfiguration -- 3.1 Heuristic-Based Approaches for Distribution Network Reconfiguration -- 4 Meta-Heuristic-Based Approaches for Distribution Network Reconfiguration -- 4.1 Reconfiguration Strategy Based on Simulated Annealing -- 4.2 Reconfiguration Strategy Based on the Genetic Algorithm -- 4.3 Reconfiguration Strategy Based on Evolutionary Programming -- 4.4 Reconfiguration Strategy Based on Particle Swarm Optimization (PSO) -- 4.5 Reconfiguration Strategy Based on Artificial Neural Network (ANN) -- 5 Reconfiguring Distribution Networks for Improvement of Reliability -- 6 Conclusion -- References -- 8

Solar Power Forecasting Using Deep Learning Approach -- 1 Introduction -- 2 Data Analysis -- 3 Deep Learning Techniques-Based CNN and LSTM Model -- 3.1 Convolutional Neural Network -- 3.2 Long Short-Term Memory -- 4 Performance Scheme Evaluation -- 5 Results and Discussion -- 6 Conclusion -- References.

9 Optimization Techniques of Load Frequency Control for Renewable Integrated Two-Area Power System -- 1 Introduction -- 2 Problem Formulation -- 2.1 LFC in Renewable Integrated Power System -- 2.2 Control Structure -- 2.3 Objective Function -- 3 Optimization Techniques -- 3.1 Particle Swarm Optimization -- 3.2 Ant Colony Optimization -- 3.3 Crow Search Algorithm -- 3.4 Genetic Algorithm -- 4 Simulation Results and Analysis -- 4.1 Scenario 1: Normal Load Without PV and wind -- 4.2 Scenario 2: Variable Load Without PV and wind -- 4.3 Scenario 3: Normal Load with PV and wind -- 4.4 Scenario 4: Variable Load with PV and wind -- 5 Conclusion -- References -- 10

On Selection of Solar Position-Dependent Regressor Set for Variability Modeling of Nature-Inspired Time Series -- 1 Introduction -- 2 Variability Modeling -- 2.1 Variability Modeling Techniques -- 3 Selection of Solar Position-Dependent Regressor Set -- 3.1 Challenges in Regressor Selection -- 3.2 Regressor Selection Approach -- 3.3 Potential Regressor Set Selection via Statistical Analysis -- 4 Result Analysis -- 5 Conclusion -- References -- 11

AI Interface of Smart Grid for Revamp of Electrical Infrastructure -- 1 Introduction -- 1.1 Motivation Incites -- 1.2 Research Contribution -- 1.3 Paper Organization -- 2 Artificial Intelligence Tools in Smart Grid System -- 2.1 AI Prospects, Trends, and Possibilities in Smart Grids -- 3 AI-Based Smart Grids' Applications -- 3.1 Online Energy Trading and Power Load

Forecasting -- 3.2 Prediction of Renewable Energy -- 3.3 Detection and Defense Against Power Grid Failures -- 3.4 Consumer Energy Use Patterns -- 3.5 Security of the Smart Grid Power Network -- 4 SWOT Analysis on Smart Grid -- 4.1 SWOT Analysis Application -- 5 Discussion -- 6 Conclusion -- References -- 12 A Comparative Study of the Justifications Provided for Aerodynamic Lift -- 1 Introduction. 2 Incorrect Theories -- 3 Coanda Effect -- 4 Causes of Fast Movement of Air on the Upper Side of Aerofoil -- 5 Explanation of Lift Generation and Calculation of Lift -- 6 Universal Theory of Lift -- 7 Conclusion -- References -- 13 Optimization of Dielectric Material and Gradings of the Post-type FGM Spacer for a Multi-Objective Function -- 1 Introduction -- 2 Proposed Objective Function for the Design of the Spacer Material -- 2.1 Minimization of Electric Field -- 2.2 Uniform Electric Field Distribution -- 2.3 Proposed Multi-objective Function -- 3 Proposed Optimization of Dielectric Material of FGM Spacer -- 4 Results and Discussion -- 4.1 Design of 4G-FGM Spacer -- 4.2 FGM Spacer Design with Six Layers -- 4.3 Design of 8G-FGM Spacer -- 4.4 Comparative Analysis of Results -- 5 Conclusion -- References -- 14 Nonlinear Behaviour of Rotor Angle Dynamics in Three-Machine Infinite Bus Power System -- 1 Introduction -- 2 Mathematical Modelling of Three-Machine Infinite Bus System -- 3 Nonlinear Dynamical Behavior of Multimachine System -- 3.1 Dynamic Behaviour Versus Mechanical Input Power of Machine 1, Machine 2, and Machine 3 -- 3.2 Discussion -- 4 Conclusion -- References -- 15 Microgrid in Grid-Tied and Islanded Mode: Asset Configuration and Operating Cost Optimization -- 1 Introduction -- 2 Hybrid Microgrid -- 3 Homer Pro Software -- 4 Simulation Model -- 5 Results and Discussions -- 6 Conclusion -- References -- 16 Impact Analysis of Symmetrical/Sequence-Domain Parameters During Dynamics in the Power System -- 1 Introduction -- 2 Problem Formulation -- 3 Simulation Results -- 3.1 Varying Magnitude of Phases -- 3.2 Varying Phase Angle of Phases -- 4 Observations -- 4.1 Varying Magnitude of Phases -- 4.2 Varying Phase Angle of Phases -- 5 Conclusion -- References -- 17 Impact of Induced Currents During Shunt Faults in HVAC Transmission Lines. 1 Introduction -- 2 Faults in Power System -- 3 Types of Transmission Line Short-Circuit Faults -- 4 Three-Phase Transmission Line Single Line Diagram -- 4.1 Description of the Simulation Model -- 5 Results -- 6 Conclusion -- References -- 18 Battery and SMES-Based Dynamic Voltage Restorer Performance Verification Under Various Load Conditions in a Grid-Connected PV-Wind System -- 1 Introduction -- 2 Design of the Proposed System -- 3 BES-SMES-Hybrid DVR -- 4 Control Technique Implementation -- 5 Results Analysis in the System with Different Condition -- 5.1 DVR Eliminates Voltage Sag-Linear Load Connected -- 5.2 DVR Eliminates Voltage Harmonics-Nonlinear Load Connected -- 5.3 DVR Eliminates Voltage Harmonics and Sag Combine Problem-Linear and Nonlinear Load Connected -- 6 Conclusions -- References -- 19 Performance Comparison of Different Controller Implementation in a PV Fed SAPF -- 1 Introduction -- 2 PV Fed SAPF Proposed System -- 3 Proposed Controller of SAPF -- 4 Reference Signal Generation -- 4.1 JAYA and Modified JAYA with PI -- 5 Result and Analysis -- 5.1 Case-1-PV Fed SAPF with PI -- 5.2 Case-2-PV Fed SAPF with PI-JAYA Combined -- 5.3 Case-3-PV Fed SAPF with PI-Improved JAYA Combined -- 6 Conclusions -- References -- 20 Substation Automation System (SAS) Using SIEMENS SICAM 230 -- 1 Introduction -- 2 System Structure (Conventional versus Automation) -- 3 System Specification -- 4 Configuration and Integration -- 5 Results and Analysis -- 6 Conclusions -- References -- 21

Performance of SMES Charging Station with Fuzzy Logic Controlled  
Based Thyristor -- 1 Introduction -- 2 Thyristor-Based SMES Modelling  
-- 3 Control Modelling of Fuzzy Logic Control -- 4 Result and Analysis  
-- 5 Conclusions -- References -- 22 Design of PIPD Controller  
for Industrial Unstable and Integrating Processes with Time Delays -- 1  
Introduction.  
2 Elementary Information.
