(2023) is essential reading for corporate executives and board directors. With powerful research and case studies, Alice Korngold shows that inclusion and sustainability are fundamental for companies to grow value and advance prosperity -- for business and society." - Michael Cherkasky, Co-Founder and Board Director, Exiger Influential libertarians from diverse backgrounds and professions who have worked toward a freer society across the globe share their personal and intellectual journeys, including what their lives and thoughts were before they embraced libertarianism; which people, texts, or events most inspired them; what experiences, challenges, tribulations, and achievements they have had as participants or leaders in this movement, and how this philosophy has affected their private and professional lives. The volume's 80 contributors span the political-philosophical spectrum of libertarianism, including anarcho-capitalists, minarchists, constitutionalists, classical liberals, and thick libertarians. Their essays express different perspectives on many issues even while articulating such core principles as an appreciation for individual liberty, private property rights, the rule of law, and free enterprise. Together, they represent myriad individual journeys towardlibertarianism, however defined. By bringing together a range of contemporary voices from outside the dominant left-right paradigm, this book aims to contribute to the viewpoint diversity that is crucially needed in today's public discourse. These autobiographies not only offer compelling insights into their individual authors and the state of the world today, but may also inspire the next generation to make our society a freer one.
