

1. Record Nr.	UNINA9910746094803321
Autore	Musso Carlos Guido
Titolo	Organ Crosstalk in Acute Kidney Injury : Basic Concepts and Clinical Practices // edited by Carlos Guido Musso, Adrian Covic
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2023
ISBN	3-031-36789-8
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (219 pages)
Altri autori (Persone)	CovicAdrian
Disciplina	616.614
Soggetti	Internal medicine Geriatrics Nephrology Immunology Internal Medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Nosology and Semiotics -- Acute kidney injury: definition and generalities. -- Hormones -- Neurotransmitters and autonomous nervous system -- Cytokines, chemokines, inflamasomes, myokines and complement-related factors in acute kidney injury (AKI) -- Cell Adhesion and Cell Cycle Mediators -- Genetics and Epigenetics of Acute Kidney Injury -- Organ Crosstalk and Acute Kidney Injury -- Brain-Kidney Crosstalk in Acute Kidney Injury -- Lung-Kidney Crosstalk in Acute Kidney Injury -- Heart-Kidney Crosstalk in Acute Kidney Injury -- Gut-Kidney Crosstalk in Acute Kidney Injury -- Liver-Kidney Crosstalk in Acute Kidney Injury -- Muscle-Kidney Crosstalk in Acute Kidney Injury -- Placenta-Kidney Crosstalk in Acute Kidney Injury -- Renal Replacement Treatment and Crosstalk in Acute Kidney Injury -- Acute Kidney Injury and Organ Crosstalk in COVID-19 Infection.
Sommario/riassunto	This is an original work dedicated to an important and current topic in nephrology: organ crosstalk in acute renal injury. Acute kidney injury is a prevalent and serious syndrome. The related mortality to this syndrome has not been significantly reduced in the last decades despite the advances in renal replacement therapy technology. For this

reason, a new approach to obtain an effective treatment is urgently needed. The organ crosstalk perspective could be useful in order to achieve this objective since it implies a very early acute kidney injury diagnose and treatment. This book includes a comprehensive review of the organ crosstalk perspective in acute kidney injury. Organized in two parts, the chapters in the first part present general subjects as an introduction to analysing the crosstalk concept. These chapters give an overview of the concepts of biosemiotics, hormones, neurotransmitters, cytokines, signalling and adhesion molecules, organ intercommunication, and epigenetics. The second part gathers chapters on the different kidney crosstalk, such as brain, lung, heart, liver, gut, and placenta. Finally, there is a chapter dedicated to the influence of renal replacement treatment on kidney crosstalk. Since acute kidney injury is a topic of interest to many health professionals, this work will be a useful resource to general practitioners, internal medicine physicians, geriatricians, nephrologists, critical care therapists, immunologists, and also biologists and bioengineers.
