

1. Record Nr.	UNINA9910746300303321
Autore	Wesselius Jaap
Titolo	Pro Exchange Administration : Understanding on-Premises and Hybrid Exchange Deployments
Pubbl/distr/stampa	Berkeley, CA : , : Apress L. P., , 2023 ©2023
ISBN	1-4842-9591-9
Edizione	[3rd ed.]
Descrizione fisica	1 online resource (945 pages)
Altri autori (Persone)	de RooijMichel
Disciplina	005.713769
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Intro -- Table of Contents -- About the Authors -- About the Technical Reviewer -- Introduction -- Part I: Infrastructure and Exchange Server -- Chapter 1: Exchange 2019 Introduction -- Exchange Server 2019 Editions -- What's New in Exchange Server 2019 -- What Has Been Discontinued or Deprecated in Exchange Server 2019 -- Exchange 2019 and Active Directory -- Integration with Active Directory -- Active Directory Partitions -- Active Directory Permissions -- Active Directory Sites -- Exchange Online and Azure Active Directory -- Exchange Server 2019 Architecture -- Exchange 2019 Services -- Exchange 2019 Client Access Services -- Exchange 2019 Mailbox Services -- Exchange Server 2019 Management -- Exchange Admin Center -- Exchange Admin Center in Exchange Online -- Exchange Management Shell -- PowerShell -- Additional Modules -- Remote PowerShell -- PowerShell ISE -- Exchange Online PowerShell -- Virtualization -- Summary -- Chapter 2: Exchange Infrastructure -- Designing Your Exchange 2019 Environment -- Exchange 2019 Server Role Requirements Calculator -- Installation of Exchange 2019 -- Hardware Requirements -- Software Requirements -- Installing Exchange 2019 -- Disk Configuration -- Installing Prerequisite Software -- Exchange 2019 Unattended Setup -- Prepare the Schema Partition -- Prepare the Configuration Partition -- Prepare the Domain Partition -- Exchange 2019 Unattended Setup -- Exchange 2019 Graphical Setup -- Configuring the Exchange 2019 Server -- Configuring Exchange 2019 -- Virtual Directories --

Configure an SSL Certificate -- Request an SSL Certificate Using EMS -- Exporting an Existing SSL Certificate -- Importing an Existing SSL Certificate -- Create a Send Connector -- Receive Connectors -- Accepted Domains -- Create an Email Address Policy -- Relocate the Initial Mailbox Database (GUI Setup Only). Relocate the SMTP Queue Database (Optional) -- Relocate IIS Log Files (Optional) -- Enter a Product Key -- Add Additional Mailbox Databases -- High Availability -- Mailbox Service High Availability -- Cluster Nodes and the File Share Witness -- Cluster Administrative Access Point -- Replication -- File Mode Replication -- Block Mode Replication -- Seeding -- Replication (Copy) Queue and Replay Queue -- Lagged Copies -- Active Manager -- DAG Across (Active Directory) Sites -- DAG Networks -- DAG Creation -- Creating the Database Availability Group Object -- Adding Exchange Servers -- Adding the Mailbox Database Copies -- Configuring the DAG Networks -- Exchange Transport -- Transport Pipeline -- Routing Destinations -- Delivery Groups -- Queues -- Shadow Redundancy -- Managing Queues -- Safety Net -- Send and Receive Connectors -- Send Connectors -- Receive Connectors -- SMTP Relay -- Create a New Receive Connector -- Modify Permissions on the Receive Connector -- Message Tracking -- Edge Transport Server -- Installing and Configuring Edge Transport Servers -- Prepare the Edge Transport Server -- Unattended Installation of the Edge Transport Server -- Create an Edge Subscription -- Relocate the Transport Database -- Test the Edge Transport Server -- Export and Import Edge Configuration -- Protocol Logging -- SSL Certificates -- Load-Balancing the Edge Transport Servers -- Upgrading from Exchange 2013 or Exchange 2016 -- Moving to Exchange 2019 -- Installing Exchange 2019 -- Namespaces with Exchange -- Virtual Directories -- SSL Certificates -- SMTP Mail in a Coexistence Scenario -- Using an Edge Transport Server -- Continuing with the Previous Edge Transport Server -- Introducing a New Exchange 2019 Edge Transport Server -- Moving Resources to Exchange 2019 -- Moving Mailboxes to Exchange 2019 -- Address Lists in Exchange 2019. Decommissioning the Previous Exchange Server -- Summary -- Chapter 3: Managing Exchange -- Managing Databases -- Rename a Mailbox Database -- Move a Mailbox Database -- Circular Logging -- Quota Settings -- Assign an Offline Address Book -- Create a New Mailbox Database -- Delete a Mailbox Database -- Online Maintenance -- Deleted Items Retention -- Online Maintenance -- Managing Mailboxes -- Create a User Mailbox -- Mailbox-Enabling an Existing User Account -- Remove a Mailbox -- Managing Mailboxes -- Active Directory Properties -- Quota Settings -- Regional Settings -- Assign Address Book Policies -- Adding Email Addresses -- Archive Mailboxes -- Cmdlet Extension Agents -- Mailbox Delegation -- Moving Mailboxes -- Importing and Exporting Mailboxes to PST Files -- Resource Mailboxes -- Shared Mailboxes -- Linked Mailboxes -- Managing Groups -- Create a New Distribution Group -- Mail-Enable an Existing Group -- Manage Group Membership -- Group Membership Approval -- Dynamic Distribution Groups -- Moderated Distribution Group -- Expansion Server -- Remove a Distribution Group -- Managing Contacts -- Mail-Enabled Contacts -- Mail-Enabled Users -- Cumulative Updates and Security Updates -- Cumulative Updates -- Security Updates -- Monitoring and Reporting -- Monitoring Tools -- Event Viewer -- Crimson Channel -- Performance Monitoring -- Task Manager -- Performance Monitor Tool -- Real-Time Monitoring -- Performance Monitor Logging -- Managed Availability -- End-to-End Monitoring -- Managed Availability Architecture -- Exchange 2013 CAS

and Managed Availability -- Monitoring Using the Exchange Management Shell -- Server Health -- Queue Monitoring -- Mailbox Database Replication -- Workload Management -- Managing Workloads by Monitoring System Resources -- Workloads and Performance -- Workload Classifications -- Workload Management Policy Settings. Managing Workloads for Individual Users -- Summary -- Part II: Office 365 Integration -- Chapter 4: Azure AD Identities -- Cloud Identities -- Synchronized Identities -- Federated Identities -- Azure AD Connect -- AD Connect Deployment -- AD Connect Health -- Chapter 5: Exchange Online -- Exchange Hybrid Topologies -- Deploying Exchange Hybrid -- Hybrid Configuration Wizard -- PowerShell: Connecting to Office 365 -- Connecting to Exchange Online -- Connecting to Azure Active Directory -- OAuth -- Autodiscover in Exchange Hybrid -- Mailbox Migration -- Managing Remote Mailboxes -- Federation with Azure Active Directory -- Sharing of Information -- Organizational Relationships -- Sharing Policies -- Internet Calendar Publishing -- Mail Transport -- Inbound Mail -- Centralized Mail Transport -- Outbound Mail -- Enhanced Filtering -- Exchange Online Archiving -- Message Tracking -- Recipient Management Only -- Summary -- Part III: Security -- Chapter 6: Publishing Exchange Server -- Virtual Directories -- Namespaces -- Split DNS -- Certificates -- Requesting Certificates -- Exporting Certificates -- Importing Certificates -- Autodiscover -- Domain-Joined Clients -- Non-Domain-Joined Clients -- Autodiscover Redirect -- Autodiscover SRV Records -- Autodiscover V2 -- Client Connectivity -- Outlook -- MAPI over HTTP -- Web-Based Clients -- Offline Settings -- Outlook Apps -- Exchange Admin Center -- Exchange Web Services -- REST API -- Mobile Clients -- IMAP and POP -- High Availability -- Load Balancing -- Health Check Monitors -- SSL Offloading -- Load Balancer Transparency -- Up-Level and Down-Level Proxying -- Azure AD Application Proxy -- Azure Front Door -- Chapter 7: Email Authentication -- Sender Policy Framework -- Constructing the SPF Record -- Checking the SPF Record -- DKIM -- Exchange and DKIM -- DKIM and Exchange Online Protection -- DMARC. Implementing DMARC -- DMARC Reporting -- DNSSEC and DANE -- DNSSEC -- DANE -- MTA-STS -- Summary -- Chapter 8: Message Hygiene and Security -- Exchange Online Protection Introduction -- Connection Filtering -- IP Allow and IP Block Lists -- Tenant Allow/Block Lists (TABL) -- Allow or Block Addresses and Domains -- Spoofed Senders -- Antimalware -- Content Filtering -- Anti-spam -- Anti-phishing -- Preset Security Policies -- Directory-Based Edge Blocking (DBEB) -- Summary -- Chapter 9: Authentication -- Hybrid Modern Authentication -- Configuring an Enterprise Application -- Multifactor Authentication -- Conditional Access -- Client Access Rules -- SMTP AUTH -- Certificate Authentication -- Windows Extended Protection -- PowerShell Serialization Payload Signing -- Summary -- Chapter 10: Permissions and Access Control -- Role-Based Access Control -- RBAC Components -- The Who -- Custom Role Group -- Linked Role Groups -- The What -- Management Roles and Management Role Entries -- Custom Management Roles -- Managing Parameters -- Unscoped Top-Level Management Roles -- Clean Up Unscoped Top-Level Management Roles -- The Where -- Regular Scopes -- Implicit Scopes -- Explicit Scopes -- Custom Scopes -- Management Scopes -- Exclusive Scopes -- 1+1+1=3: Management Role Assignments -- Role Assignment Policy -- Split Permissions -- RBAC Split Permissions -- Active Directory Split Permissions -- Summary -- Part IV: Compliance -- Chapter 11: Backup and Restore -- Back Up an Exchange Server -- Backup Technologies -- VSS Backup --

Back Up a Mailbox Database -- Using Windows Server Backup  
in PowerShell -- Using Windows Server Backup GUI -- Back Up Other  
Configuration Information -- Restoring Exchange Server -- Restoring  
to Its Original Location -- Restoring to Another Location -- The Restore  
Process -- Recovery Database -- Dial-Tone Recovery.  
Recovering an Exchange Server.
