1. Record Nr. UNINA9910555149603321

Autore	Rohde Ulrich L.
Titolo	Microwave and wireless synthesizers : theory and design / / Ulrich L. Rohde, Enrico Rubiola, Jerry C. Whitaker
Pubbl/distr/stampa	Hoboken, NJ : , : Wiley, , 2021 ©2021
ISBN	1-5231-4359-2 1-119-66611-2 1-119-66609-0 1-119-66612-0
Edizione	[Second edition.]
Descrizione fisica	1 online resource (xxii, 794 pages) : illustrations
Disciplina	621.3815486
Soggetti	Frequency synthesizers - Design and construction Phase-locked loops Digital electronics Microwave circuits - Design and construction Radio frequency Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Title Page -- Copyright -- Contents -- Author Biography -- Preface -- Important Notations -- Chapter 1 Loop Fundamentals -- 1-1 Introduction to Linear Loops -- 1-2 Characteristics of a Loop -- 1-3 Digital Loops -- 1-4 Type 1 FirstOrder Loop -- 1-5 Type 1 Second Order Loop -- 1-6 Type 2 SecondOrder Loop -- 1-6-1 Transient Behavior of Digital Loops Using Tristate Phase Detectors -- 1-7 Type 2 ThirdOrder Loop -- 1-7-1 Transfer Function of Type 2 ThirdOrder Loop -- 1-7-2 FM Noise Suppression -- 1-8 HigherOrder Loops -- 1-8-1 FifthOrder Loop Transient Response -- 1-9 Digital Loops with Mixers -- 1-10 Acquisition -- 1-10-0 Example 1 -- 1-10-1 Pullin Performance of the Digital Loop -- 1-10-2 Coarse Steering of the VCO as an Acquisition Aid -- 1-10-3 Loop Stability -- References -- Suggested Reading -- Chapter 2 ALMOST ALL ABOUT PHASE NOISE --

2-1 INTRODUCTION TO PHASE NOISE -- 2-1-1 The Clock Signal -- 2-1-2 The Power Spectral Density (PSD) -- 2-1-3 Basics of Noise -- 2-1-4 Phase and Frequency Noise -- 2-2 THE ALLAN VARIANCE AND OTHER TWOSAMPLE VARIANCES -- 2-2-1 Frequency Counters -- 2-2-2 The TwoSample Variances AVAR, MVAR, and PVAR -- 2-2-3 Conversion from Spectra to TwoSample Variances -- 2-3 PHASE NOISE IN COMPONENTS -- 2-3-1 Amplifiers -- 2-3-2 Frequency Dividers -- 2-3-3 Frequency Multipliers -- 2-3-4 Direct Digital Synthesizer (DDS) -- 2-3-5 Phase Detectors -- 2-3-6 Noise Contribution from Power Supplies -- 2-4 PHASE NOISE IN OSCILLATORS -- 2-4-1 Modern View of the Leeson Model -- 2-4-2 Circumventing the Resonator's Thermal Noise -- 2-4-3 Oscillator Hacking -- 2-5 THE MEASUREMENT OF PHASE NOISE -- 2-5-1 DoubleBalanced Mixer Instruments -- 2-5-2 The CrossSpectrum Method -- 2-5-3 Digital Instruments -- 2-5-4 Pitfalls and Limitations of the CrossSpectrum Measurements -- 2-5-5 The Bridge (Interferometric) Method.
2-5-6 Artifacts and Oddities Often Found in the Real World -- 2-5 References -- 2-5 SUGGESTED READINGS -- 2-5-6 Power spectra and Fourier transform -- 2-5-6 Electromagnetic Compatibility -- 2-5-6 General Aspects of Noise -- 2-5-6 Phase Noise, Frequency Stability, and Measurements -- 2-5-6 Amplifiers -- 2-5-6 Frequency Dividers -- 2-5-6 Frequency Multipliers -- 2-5-6 DDS -- 2-5-6 Phase Frequency Detectors -- 2-5-6 Oscillators -- 2-5-6 Resonators -- 2-5-6 DoubleBalanced Mixer -- Chapter 3 Special Loops -- 3-1 Introduction -- 3-2 Direct Digital Synthesis Techniques -- 3-2-1 A First Look at Fractional N -- 3-2-2 Digital Waveform Synthesizers -- 3-2-3 Signal Quality -- 3-2-4 Future Prospects -- 3-3 Loops with Delay Line as Phase Comparators -- 3-4 Fractional Division N Synthesizers -- 3-4-1 Example Implementation -- 3-4-2 Some Special Past Patents for Fractional Division N Synthesizers -- References -- Bibliography -- FRACTIONAL DIVISION N READINGS -- Chapter 4 LOOP COMPONENTS -- 4-1 INTRODUCTION TO OSCILLATORS AND THEIR MATHEMATICAL TREATMENT -- 4-2 THE COLPITTS OSCILLATOR -- 4-2-1 Linear Approach -- 4-2-2 Design Example for a 350MHz FixedFrequency Colpitts Oscillator -- 4-2-3 Validation Circuits -- 4-2-4 Series Feedback Oscillator [5, Appendix A, pp. 384-388] -- 4-2-5 2400 MHz MOSFETBased Push-Pull Oscillator -- 4-2-6 Oscillators for IC Applications -- 4-2-7 Noise in Semiconductors and Circuits -- 4-2-8 Summary -- 4-3 USE OF TUNING DIODES -- 4-3-1 Diode Tuned Resonant Circuits -- 4-3-2 Practical Circuits -- 4-4 USE OF DIODE SWITCHES -- 4-4-1 Diode Switches for Electronic Band Selection -- 4-4-2 Use of Diodes for Frequency Multiplication -- 4-5 REFERENCE FREQUENCY STANDARDS -- 4-5-1 Specifying Oscillators -- 4-5-2 Typical Examples of Crystal Oscillator Specifications -- 4-6 MIXER APPLICATIONS -- 4-7 PHASE/FREQUENCY COMPARATORS -- 4-7-1 Diode Rings.
4-7-2 Exclusive ORs -- 4-7-3 Sample/Hold Detectors -- 4-7-4 Edge Triggered JK Master/Slave FlipFlops -- 4-7-5 Digital TriState Comparators -- 4-8 WIDEBAND HIGHGAIN AMPLIFIERS -- 4-8-1 Summation Amplifiers -- 4-8-2 Differential Limiters -- 4-8-3 Isolation Amplifiers -- 4-8-4 Example Implementations -- 4-9 PROGRAMMABLE DIVIDERS -- 4-9-1 Asynchronous Counters -- 4-9-2 Programmable Synchronous Up/DownCounters -- 4-9-3 Advanced Implementation Example -- 4-9-4 Swallow Counters/DualModulus Counters -- 4-9-5 LookAhead and Delay Compensation -- 4-10 LOOP FILTERS -- 4-10-1 Passive RC Filters -- 4-10-2 Active RC Filters -- 4-10-3 Active Second Order LowPass Filters -- 4-10-4 Passive LC Filters -- 4-10-5 Spur Suppression Techniques -- 4-11 MICROWAVE OSCILLATOR DESIGN --

4-11-1 The Compressed Smith Chart -- 4-11-2 Series or Parallel Resonance -- 4-11-3 TwoPort Oscillator Design -- 4-12 MICROWAVE RESONATORS -- 4-12-1 SAW Oscillators -- 4-12-2 Dielectric Resonators -- 4-12-3 YIG Oscillators -- 4-12-4 Varactor Resonators -- 4-12-5 Ceramic Resonators -- 4-12 REFERENCES -- 4-12 SUGGESTED READINGS -- 4-12-5 Section 43 Documents -- 4-12-5 Section 45 Documents -- 4-12-5 Section 46 Documents -- 4-12-5 Section 47 Documents -- 4-12-5 Section 48 Documents -- 4-12-5 Section 4.9 Documents -- 4-12-5 Section 4.10 Documents -- 4-12-5 Section 4.11 Documents -- 4-12-5 Section 4.12 Documents -- Chapter 5 Digital PLL Synthesizers -- 5-1 Multiloop Synthesizers Using Different Techniques -- 5-1-1 Direct Frequency Synthesis -- 5-1-2 Multiple Loops -- 5-2 System Analysis -- 5-3 LowNoise Microwave Synthesizers -- 5-3-1 Building Blocks -- 5-3-2 Output Loop Response -- 5-3-3 Low Phase Noise References: Frequency Standards -- 5-3-4 Critical Stage -- 5-3-5 Time Domain Analysis -- 5-3-6 Summary -- 5-3-7 Two Commercial Synthesizer Examples.
5-4 Microprocessor Applications in Synthesizers -- 5-5 Transceiver Applications -- 5-6 About Bits, Symbols, and Waveforms -- 5-6-1 Representation of a Modulated RF Carrier -- 5-6-2 Generation of the Modulated Carrier -- 5-6-3 Putting It all Together -- 5-6-4 Combination of Techniques -- 5-6 Acknowledgments -- 5-6 References -- 5-6 Bibliography and Suggested Reading -- Chapter 6 A HighPerformance Hybrid Synthesizer -- 6-1 Introduction -- 6-2 Basic Synthesizer Approach -- 6-3 Loop Filter Design -- 6-4 Summary -- Bibliography -- Chapter A Mathematical Review -- A-1 FUNCTIONS OF A COMPLEX VARIABLE -- A-2 COMPLEX PLANES -- A-2-1 Functions in the Complex Frequency Plane -- A-3 BODE DIAGRAM -- A-4 LAPLACE TRANSFORM -- A-4-1 The Step Function -- A-4-2 The Ramp -- A-4-3 Linearity Theorem -- A-4-4 Differentiation and Integration -- A-4-5 Initial Value Theorem -- A-4-6 Final Value Theorem -- A-4-7 The Active Integrator -- A-4-8 Locking Behavior of the PLL -- A-5 LOW NOISE OSCILLATOR DESIGN -- A-5-1 Example Implementation -- A-6 OSCILLATOR AMPLITUDE STABILIZATION -- A-7 VERY LOW PHASE NOISE VCO FOR 800 MHZ -- REFERENCES -- Chapter B A General Purpose Nonlinear Approach to the Computation of Sideband Phase Noise in FreeRunning Microwave and RF Oscillators -- B-1 Introduction -- B-2 Noise Generation in Oscillators -- B-3 BiasDependent Noise Model -- B-3-1 BiasDependent Model -- B-3-2 Derivation of the Model -- B-4 General Concept of Noisy Circuits -- B-4-1 Noise from Linear Elements -- B-5 Noise Figure of Mixer Circuits -- B-6 Oscillator Noise Analysis -- B-7 Limitations of the FrequencyConversion Approach -- B-7-1 Assumptions -- B-7-2 Conversion and Modulation Noise -- B-7-3 Properties of Modulation Noise -- B-7-4 Noise Analysis of Autonomous Circuits -- B-7-5 Conversion Noise Analysis Results -- B-7-6 Modulation Noise Analysis Results.
B-8 Summary of the Phase Noise Spectrum of the Oscillator -- B-9 Verification Examples for the Calculation of Phase Noise in Oscillators Using Nonlinear Techniques -- B-9-1 Example 1: HighQ Case Microstrip DRO -- B-9-2 Example 2: 10 MHz Crystal Oscillator -- B-9-3 Example 3: The 1GHz Ceramic Resonator VCO -- B-9-4 Example 4: Low Phase Noise FET Oscillator -- B-9-5 Example 5: MillimeterWave Applications -- B-9-6 Example 6: Discriminator Stabilized DRO -- B-10 Summary -- B-10 References -- Chapter C EXAMPLE OF WIRELESS SYNTHESIZERS USING COMMERCIAL ICs -- Chapter D MMICBASED SYNTHESIZERS -- D-1 INTRODUCTION -- BIBLIOGRAPHY -- Chapter E ARTICLES ON DESIGN OF DIELECTRIC RESONATOR OSCILLATORS -- E-1 THE DESIGN OF AN ULTRALOW PHASE NOISE DRO -- E-1-1 Basic

	Considerations and Component Selection -- E-1-2 Component Selection -- E-1-3 DRO Topologies -- E-1-4 Small Signal Design Approach for the Parallel Feedback Type DRO -- E-1-5 Simulated Versus Measured Results -- E-1-6 Physical Embodiment -- E-1-7 Acknowledgments -- E-1-8 Final Remarks -- REFERENCES -- BIBLIOGRAPHY -- E-2 A NOVEL OSCILLATOR DESIGN WITH METAMATERIALMOBIUS COUPLING TO A DIELECTRIC RESONATOR -- E-2-1 Abstract -- E-2-2 Introduction -- REFERENCES -- Chapter F OPTO ELECTRONICALLY STABILIZED RF OSCILLATORS -- F-1 INTRODUCTION -- F-1-1 Oscillator Basics -- F-1-2 Resonator Technologies -- F-1-3 Motivation for OEO -- F-1-4 Operation Principle of the OEO -- F-2 EXPERIMENTAL EVALUATION AND THERMAL STABILITY OF OEO -- F-2-1 Experimental Setup -- F-2-2 Phase Noise Measurements -- F-2-3 Thermal Sensitivity Analysis of Standard Fibers -- F-2-4 Temperature Sensitivity Measurements -- F-2-5 Temperature Sensitivity Improvement with HCPCF -- F-2-6 Improve Thermal Stability Versus Phase Noise Degradation -- F-2-7 Passive Temperature Compensation -- F-2-8 Improving Effective Q with Raman Amplification. F-3 FORCED OSCILLATION TECHNIQUES OF OEO.

Record Nr.	UNINA9910746965103321
Autore	Zsolnai Laszlo
Titolo	Value Creation for a Sustainable World : Innovating for Ecological Regeneration and Human Flourishing / / edited by Laszlo Zsolnai, Thomas Walker, Paul Shrivastava
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2023
ISBN	9783031380167 3031380169
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (329 pages)
Collana	Palgrave Studies in Sustainable Business In Association with Future Earth, , 2662-1339
Altri autori (Persone)	WalkerThomas ShrivastavaPaul
Disciplina	658.408
Soggetti	Industrial management - Environmental aspects Industrial organization Management Technological innovations Corporate Environmental Management Organization Innovation and Technology Management

Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part 1 Introduction -- Human Flourishing and Ecological Regeneration -- Is the Green Economy Saving the Planet or Saving Capitalism? -- Part 2 Sustainable Value Creation Models -- New Consciousness for the Sustainability Imperative -- Values-Driven Management and the Sustainable Development Goals -- Sustainable Development Goals for Business -- Business as Social Movement – The Case of Green Monday -- Community-Centred Enterprises in India -- The Role of Sami Culture in Creating Sustainable Value for Tourists – The Case of Jokkmokk's Market -- Beyond Fair Trade – Illy Café in Central and Latin America -- Helping the Disadvantaged, Helping the Society -- Located Making for Sustainable Enterprise -- Digitalization and Social Innovation (ENVIENTA) -- Digital Female Entrepreneurship Creating Multidimensional Value: From Customers to Mobilized Citizens -- Principles and Models of the Community Economy -- Part 3 Enabling Policies for Socio-Ecological Wellbeing -- Ecological Restoration of Rivers with Dam Removals -- The Sufficiency Economy Philosophy as a Method for Sustainable Community Development: Case Studies of Local Governments in Thailand -- Sustainable Value Creation Models in Malaysia – The Sejahtera Leadership Experience -- Wellbeing Policies for Countries and Cities – Bhutan, New Zealand, Costa Rica, and Amsterdam -- Part 4 Ways Forward -- Sustainable Livelihood and the Fair Earth Share of Communities.
Sommario/riassunto	The ecological, social and technological challenges of the Anthropocene require developing and implementing new economic, business, and financial models to create sustainable value for a wide range of stakeholders including nature, society, and future generations. This book defines ‘sustainable value creation’ as bringing forth products, services, organizational forms, processes, actions, and policies which satisfy real social needs and contribute to the ecological regeneration of nature. The book collects and analyzes innovative economic, business, and social models of sustainable value creation globally. It critically examines the existing mainstream models of business and financial value creation. In reviewing both traditional and sustainability-oriented models, it focuses on both the challenges and opportunities inherent in a possible shift from models based on single-stakeholder wealth creation to models that propagate multidimensional value creation. Part of the Palgrave Studies in Sustainable Business in Association with Future Earth series, this book aims to engage academics, and business and civil society practitioners to discuss innovative value creation models for a sustainable world. Interdisciplinary and intercultural exchange will be facilitated to inspire and cross-fertilize different knowledge and action fields as well as to promote intergenerational dialogue about the prospects of the human-earth system. Laszlo Zsolnai is Professor and Director of the Business Ethics Center at Corvinus University of Budapest. He is Associate Member of Blackfriars Hall, University of Oxford. He serves as President of the European SPES Institute in Leuven, Belgium. Thomas Walker is Professor of Finance and Director of Emerging Risks Information Centre (ERIC) and the Jacques Ménard - BMO Centre for Capital Markets at the John Molson School of Business, Concordia University, Montreal. Paul Shrivastava is Professor of Management at the Smeal College of

Business at The Pennsylvania State University, USA. In 2018 he joined as a full member of the Club of Rome. .
