Sommario/riassunto

The book intends to capture the most critical issue that has cropped up as an aftermath of the Corona pandemic- the phenomenon of widening of global inequalities across nations depending upon their economic position, support policies of the government and international relationship particularly in the context of alarming growth of unemployed in the labour market, business activity and social sector. This book is expected to provide new areas of research to both academicians and policy makers to re-think about global cooperation for bridging the inequalities for a better world. It tries to incorporate the valuable contribution of experts from various fields of knowledge in a consolidated volume. This text will be revised once the chapters are finalized and put together in structured themes. The table of content lists some of the chapters that have been confirmed, but there are more that are being invited by the editors.
