Sommario/riassunto	In this book, the authors present a combination of research-by-design, place-based, and policy-oriented approaches to the territorial fragilities of Nicosia. Nicosia, in Cyprus, is a city divided. Since 1974, a 180 km long Buffer Zone has separated the Turkish Republic of Northern Cyprus (TRNC) and the Republic of Cyprus (RoC). This "open wound" cuts through the city's historical center, crossing the Venetian walls, a key cultural heritage asset, and impacting the city's spatial and cultural identity. Outcomes of an inter-doctoral research initiative, this edited book documents the local realities of the divided city and tests scenarios and spatial patterns of intervention to cope with the partition through the enhancement of local cultural heritage. The book targets an academic audience, architects, urban planners, heritage preservation

professionals and policymakers, providing a transferable research method relevant to those approaching a complex, fragile, and contested "border territory". .
