Sommario/riassunto	<p>The study of the origins and early years of the Fourth International acquires a special relevance when considering them as part of the process of construction and criticism of the organizational and political tools of the working class that continues to this day. From its origins, the Fourth International was marked by political disputes within the Communist International, by the first positions as the Left Opposition, by the persecution of Trotskyist sympathizers and by the assassination of Leon Trotsky. Thus, this book is based on the need and the importance of investigating the history of Socialist Internationals in the key of an international history of socialism, insofar as the local and regional expressions of this current can be comprehensively understood through comparative and transnational analysis.</p> <p>Trotskyists under Nazi terror. A history of the Fourth International during World War II, develops a historical analysis of the political perspective carried out by the Fourth International in Europe during World War II through the comparative study of the French, North American, Belgian and British sections. Taking as one of the central axes the resurgence of the discussion on the national question in Europe, it is observed how the crisis of the Fourth International did not</p>

begin with the debate on entryism in 1953 but ten years before, due to the difficulties of the organization to adapt to the new European scenario inaugurated in mid-1943 with the deposition of Benito Mussolini and the beginning of the "bourgeois-democratic counterrevolution" from the intervention of the United States during the last years of the war.

Nota di contenuto	<p>Part 1. Introduction and Overview of Theoretical, Research, and Application Topics -- Chapter 1: Introduction to Families with Adolescents -- Chapter 2: Overview of Theory, Research, and Application Topics in Families with Adolescents -- Part 2. Theorizing About Families with Adolescents -- Chapter 3: Family Development Theory -- Chapter 4: Family Systems Theory -- Chapter 5: Ecological Theory in Family with Adolescents Studies -- Chapter 6: Attachment Theory in Family with Adolescents Studies -- Chapter 7: Social Learning Theory in Family with Adolescents Studies -- Part 3. Research on Families with Adolescents -- Chapter 8: Research on the Parent-Adolescent Dyad -- Chapter 9: Polyadic Research on Families with Adolescents -- Chapter 10: The Family's Impact on Adolescent Outcomes -- Part 4. Application Topics Concerning Families with Adolescents -- Chapter 11: Family Therapy and other Family Intervention-Based Efforts with Adolescents -- Chapter 12: Prevention Programs for Families with Adolescents -- Part 5. Future Directions in Families with Adolescents Research and Practice -- Chapter 13: Outlook on Theoretical, Research, and Application Efforts in Families with Adolescents -- Chapter 14: The Need to Integrate Theory, Research, and Application Efforts in Families with Adolescents.</p>
Sommario/riassunto	<p>The second edition of this book offers an expanded and updated blueprint for more consistently improved practice, emphasizing family process and structure instead of only individual developmental stages. Its chapters deftly summarize the recent knowledge base about families with adolescents and explains how to apply these results across mental health and social services disciplines. The new edition clearly illustrates family concerns and theoretical perspectives through real-world vignettes and cogent use of family assessment measures. Chapters offer a broad understanding of how diversity in all its forms – including race/ethnicity, culture, religion, and sexual orientation – has created a much more nuanced understanding of how families with adolescents are able to function within their environment. Both major challenges to families and communities form the backdrop of the second edition's focus on forecasting in which the theoretical, empirical, and intervention literatures necessarily move in service to the health and well-being of families with adolescents. Featured topics include: Central concepts of family development, family systems, ecological, attachment, and social learning theories in relation to families with adolescents. Influence of the family on adolescent problem behavior, mental health concerns, substance use issues, educational attainment, and social competence outcomes. Selected studies on parenting behaviors, conflict resolution, and other major aspects of families with adolescents. Application topics in family-based intervention and prevention programs. Integrating theory, research, and applications to create a “triple threat” model. Diversity issues surrounding race/ethnicity, culture, religion, and sexual orientation. Families with Adolescents, Second Edition, is an essential resource for researchers, professors, and graduate and advanced undergraduate students as well as professionals and other mental health clinicians, practitioners, and therapists in clinical child and developmental psychology, family studies, human development, sociology, social work, education, and all</p>

allied disciplines.
