Sommario/riassunto	This book explores the state of play on the Korean peninsula, where

old conflicts remain latent. Regarding security on the Korean Peninsula, however, this book challenges the belief that the internal affairs of states should be discounted and posits that to have a fuller perspective of comprehensive peacebuilding on the Korean Peninsula, all aspects of the security spectrum should be considered from the perspective of both challenges to building peace and opportunities for doing so. In particular, the internal governance functioning of the Democratic People's Republic of Korea (DPRK) regime will be considered, as well as the intersection between regime security, economic development and distributive justice, and South Korean perceptual, ideational, and bottom-up approaches to peace on the Korean Peninsula. Hence, this book will be of interest to scholars of the region, journalists and peace-makers.
