

1. Record Nr.	UNINA9910753400203321
Autore	Bergmann Jonas
Titolo	At Risk of Deprivation [[electronic resource] ] : The Multidimensional Well-Being Impacts of Climate Migration and Immobility in Peru // by Jonas Bergmann
Pubbl/distr/stampa	Wiesbaden : , : Springer Fachmedien Wiesbaden : , : Imprint : Springer VS, , 2024
ISBN	3-658-42298-X
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (471 pages)
Collana	Studien zur Migrations- und Integrationspolitik, , 2567-3157
Disciplina	577.22
Soggetti	Bioclimatology Human ecology - Study and teaching Climate Change Ecology Environmental Studies
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Conceptual Approach -- Research Philosophy, Methodological Implications, and Research Design -- State of the Evidence on Climate (Im)mobilities and Well-Being -- Sierra: Rural-to-Urban Migration and Immobility Related to Water Scarcity in Peru's Highlands -- Selva: Flood-Driven Entrapment and Planned Relocation in Peru's Rainforest -- Costa: Flood Displacement During the 2017 Coastal El Niño in Peru -- Comparative Analysis and Overarching Propositions -- Conclusions -- References.
Sommario/riassunto	This open access book examines how and why various forms of climate (im)mobilities can impact people's objective and subjective well-being. Worsening climate impacts are forcing subsistence farmers worldwide to decide between staying or leaving their homes. This mixed methods study analyzes cases of climate-related migration, displacement, relocation, and immobility in Peru's coastal, highland, and rainforest regions. The results reveal that numerous farmers experienced profound and often negative well-being impacts, regardless of whether they stayed or migrated. The higher the structural constraints, such as weak governance, and the more damaging the climate impacts were, the higher the risk of well-being declines. Additionally, the affected

individuals often had limited agency and ability to mitigate losses. These findings challenge the notion of "migration as adaptation" and emphasize the importance of safeguarding the human rights and security of those affected while addressing loss and damage. Without significant investments in such efforts, climate impacts could sharply diminish the well-being of numerous subsistence farmers worldwide—irrespective of whether they stay or migrate. About the author Jonas Bergmann, an expert in climate (im)mobilities, has worked with organizations such as KNOMAD, the World Bank, and the OECD. He conducted the study for this book at the Potsdam Institute for Climate Impact Research (PIK), where he continues to serve as a guest researcher.
