

1. Record Nr.	UNINA9910755086303321
Autore	Thaller Vladimir
Titolo	Eyelid Surgery : A Fresh Perspective on Correcting Common Conditions // by Vladimir Thaller
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2023
ISBN	3-031-31527-8
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (279 pages)
Disciplina	617.771059
Soggetti	Ophthalmology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introduction -- 2. The Basics -- 3. Sutures and Suturing -- 4. Surgical Anatomy -- 5. Fundamental procedures -- 6. Eyelid Malposition -- 7. Trichiasis -- 8. Entropion -- 9. Ptosis -- 10. Dermatochalasis and Blepharoplasty -- 11. Tumor excision -- 12. Eye protection -- 13. Lid Reconstruction -- 14. Revision surgery -- 15. Watery eyes -- 16. Eye removal -- 17. Socket Reconstruction -- 18. Thyroid Eye Disease.
Sommario/riassunto	This book is a practical guide for anyone who performs eyelid surgery, whatever their specialty, and is particularly relevant for ophthalmologists in training and non-oculoplastic surgeons who may venture into this field. The step-wise text is supported by numerous original illustrations. It emphasises a logical, minimalist approach to lid surgery and challenges some popular practices. The novel techniques unique to this volume may be of interest to experienced oculoplastic surgeons. They include emphasis on the superiority of Meibomian orifice line lid traction suture placement over using the grey line. This makes bolsterless suture tarsorrhaphy a viable and better alternative to temporary surgical tarsorrhaphy. Maximal use of direct closure and directed laissez-faire encourages tissue expansion in eyelid reconstruction, aided greatly by the placement of a magic suture. The seductively simple medial canthal thermoplasty corrects medial lid laxity without dissection. The control of active thyroid eye disease with orbital depot steroid injections, the importance of full orbital volume replacement after eye removal and the superiority of modified Bick lid

margin resection over the lateral tarsal strip for lid tightening are further departures from traditional practice.
