1. Record Nr. UNINA9910760272403321

Autore	Fesenko Olena
Titolo	Nanoelectronics, Nanooptics, Nanochemistry and Nanobiotechnology, and Their Applications : Selected Proceedings of the 10th International Conference on Nanotechnologies and Nanomaterials (NANO2022), 25–27 August 2022, Ukraine / / edited by Olena Fesenko, Leonid Yatsenko
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2023
ISBN	3-031-42708-4
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (386 pages)
Collana	Springer Proceedings in Physics, , 1867-4941 ; ; 297
Altri autori (Persone)	YatsenkoLeonid
Disciplina	530.41 620.115 620.5
Soggetti	Nanoscience Nanotechnology Microtechnology Microelectromechanical systems Lasers Nanophysics Microsystems and MEMS Laser
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part 1: Nanooptics and Photonics -- 1. The Kinetic Theory of the Width of Surface Plasmon Resonance Line in Metal Nanoparticles -- 2. Optical and electrical phenomena caused by the lattice defects in PbMoO4 crystal -- 3. Effects of Eu3+ and F- doping on structure and optical properties of zirconium oxides -- 4. Electric and spectral properties of solid water-nanocellulose systems in a wide range of temperatures -- 5. The medium influence on the luminescence intensity of SnO2 nanoparticles ensembles in a porous silicate glass matrix -- 6. Spectrum of localized quasiparticle interacting with three-mode phonons -- 7. Energy Spectra Dispersion of Vibrational and Electronic States in Layered Hexagonal-BN Crystals and Single-Layer Nitroborene

(BN)L,1 -- Part 2. Nanochemistry and Nanobiotechnology -- 8. The influence of -cyclodextrin on biomembrane. The molecular dynamics simulation study -- 9. Hybrid Hydrogels With Biologically Active Dyes and Their Antibacterial Efcacy -- 10. Conjugate formation in films of polyethylene glycol and polypropylene glycol -- 11. Nanocomposites with multiwall carbon nanotubes -- 12. Synthesis, structure, optical and Bio-medical applications of Nanosized composites based on Tio2, Fe3o4 -- 13. Studying of iron oxyhydroxide dehydration -- 14. Surface reactivity of carbon nanoporous materials studied with chemical bromination -- 15. Nano-, micro- and macrotransformations of marine sediments under the influence of biocolloidal processes and aspects of nanotechnologies of their enrichment and application -- 16. Influence of Magnesium and Chrome on the Microstructure and Properties of the Al–Mg–Sc System as - Cast Alloys -- 17. Prospects for the catalytic application of Red Mud in CO oxidation -- 18. The mechanochemical synthesis of nanodispersed Bi2Mo3O12 composition -- 19. Obtaining nanostructured materials by heat treatment of amorphous zirconium-based alloy -- 20. Some Reasons of the Degradation of a Fine-Grained YSZ–NiO Anode Material during Intense Reduction and Reoxidation -- 21. Effect of nanobiopolymers on morphofunctional state of cryopreserved fragments of seminiferous tubules of testis -- 22. Ways to create promising metaloxide catalytic nanosystems for selective reduction of nitrogen oxides -- 23. Photochemical Properties Of Side Chaine Aurone Polymers.

Sommario/riassunto

This book highlights some of the latest advances in nanotechnology and nanomaterials from leading researchers in Ukraine, Europe and beyond. It features contributions presented at the 10th International Science and Practice Conference Nanotechnology and Nanomaterials (NANO2022), which was held on August 25-27, 2022 at Lviv House of Scientists, and was jointly organized by the Institute of Physics of the National Academy of Sciences of Ukraine, University of Tartu (Estonia), University of Turin (Italy), and Pierre and Marie Curie University (France). Internationally recognized experts from a wide range of universities and research institutions share their knowledge and key findings across diverse areas ranging from quantum optics and nanoelectonics to biophysics.The book will be interesting for leading scientists, advanced undergraduate and graduate students in nanoelectronics, optics, bio-and chemical engineering. This book’s companion volume also addresses topics such as nanostructured surface, nanomaterials, and its applications.
