

1. Record Nr.	UNINA9910760273803321
Autore	Karakoc T. Hikmet
Titolo	Green Approaches in Sustainable Aviation : Proceedings of International Symposium on Sustainable Aviation 2022 // edited by T. Hikmet Karakoc, Raj Das, Ismail Ekmekci, Alper Dalkiran, Ali Haydar Ercan
Pubbl/distr/stampa	Cham : , : Springer Nature Switzerland : , : Imprint : Springer, , 2024
ISBN	3-031-33118-4
Edizione	[1st ed. 2024.]
Descrizione fisica	1 online resource (188 pages)
Collana	Sustainable Aviation, , 2730-7786
Altri autori (Persone)	DasRaj EkmekciIsmail DalkiranAlper ErcanAli Haydar
Disciplina	629.1300286
Soggetti	Aerospace engineering Astronautics Vehicles Sustainability Renewable energy sources Energy policy Energy and state Environmental management Aerospace Technology and Astronautics Vehicle Engineering Renewable Energy Energy Policy, Economics and Management Environmental Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Chapter 1. A Short Review on Taxation Action in the Sustainability of Green Airports -- Chapter 2. A Covariance Matching Based Adaptive EKF for Nanosatellite Attitude Estimation -- Chapter 3. Internal Heat Gain in Airport Buildings Via Occupants -- Chapter 4. Cold Flow Properties of Biojet Fuels in Aviation -- Chapter 5. Innovative Process

for the Purification of Green Aviation Fuel Additive
"Dimethoxymethane": Pervaporation -- Chapter 6. Deceleration
Behavior of Super-Lightweight XPS Foams: Number of Layers Effect --
Chapter 7. Green Purchase Intention in the Air Travel Industry:
Influence of Environmental Knowledge and Attitude -- Chapter 8.
Evaluation of Air Transport Projects Development by (AHP) -- Chapter
9. A Comparative Study of the Reporting Approach for Corporate Social
and Environmental Responsibility between Iberia and Turkish Airlines
-- Chapter 10. Fuel Efficient Flight Level Assignments Under Wind
Uncertainties for the Conflict Resolution Problem at the En-Route Phase
-- Chapter 11. MCDM Risk Assessment in Ground Operation --
Chapter 12. Optimization of Cutting Parameters in Face Milling of
Waspaloy Superalloy -- Chapter 13. The Role of Additive Manufacturing
towards Sustainable Aerospace Structures -- Chapter 14. Aerodynamic
Performance Analysis of Penguin-Inspired Biomimetic Aircraft Wing --
Chapter 15. Leading and Trailing Edge Configuration for Distributed
Electric Propulsion Systems -- Chapter 16. Cost and Weight
Optimization of Recyclable Honeycomb Sandwich Panels -- Chapter 17.
Negative Emission Technologies: Miraculous Solution or Aberrant
Blindness? -- Chapter 18. Sustainable Operations for Airport
Warehouse Cargo Management -- Chapter 19. Outlines of Sustainable
Air Transportation in ICAO Annex Documents: Roots of Sustainability
-- Chapter 20. World Air Transportation Recovery after COVID-19
Restricts.

Sommario/riassunto

Sustainable aviation is a long-term strategy to provide innovative solutions to the industry's environmental challenges. The International Symposium on Sustainable Aviation is a multi-disciplinary symposium that presents research on current sustainability-based issues and future trends in aviation from an economic, social, and environmental perspective. The conference provides a platform offering insights on a broad range of current issues in aviation, such as aviation and environment, commercial air transport, regulations and policy, sustainable aerospace vehicles and technologies, and environmental modeling and measurements. The ISSA symposium allows researchers, scientists, engineers, practitioners, policymakers, and students to exchange information, present new technologies and developments, and discuss future direction, strategies, and priorities in sustainable aviation topics. Offers recent research on a wide array of topics; Addresses issues in aviation sustainability; Full proceedings of ISSA 2022 held at RMIT University.
