Introduction -- 2. Why study news? The democratic role of news --3. Understanding influences on the production of news -- 4. Routines and practices: studying the making of news -- 5. Journalism norms, values, and role perceptions -- 6. Journalism ethics -- 7. The news organisation -- 8. News audiences -- 9. News sources -- 10. Conclusion. Sommario/riassunto This book provides readers with the understanding required to analyse the range of key factors that shape the production of news, and to assess their implications for the role of news and journalism in democracy. It brings existing research together under the umbrella of a central organising framework to explore how news and its production is shaped by a multiplicity of factors including the norms, values, role perceptions and ethics associated with journalism as a profession, the role of news sources, the changing character and significance of news audiences, the aims and objectives of news organisations, and the political, economic and social contexts within which news is produced. Exploring these factors in depth, using examples, and considering the changing conditions of news production, the chapters chart significant

changes, challenges, and responses to provide the essential background for understanding the consequences of current

transformations for the democratic qualities of news.
JulieFirmstoneis Professor of Journalism and Political
Communicationat the School of Media and Communication, University
of Leeds, UK. Her teaching and research explore a range of issues in
the intersection between journalism, the news media, politics, and
democratic engagement. She has published widely on the role of news
and journalism in local democracy; journalism standards, press ethics
and regulation; editorial journalism at newspapers; and communication
about the European Union.
