Sommario/riassunto

Globalisation stands as an indispensable lens through which to analyse current cultural, political, and social transformations. This prevailing paradigm, acknowledged by its advocates and critics, profoundly shapes our environment. Within this global landscape, Islam's position is noteworthy—often perceived as rejecting globalisation and its secular underpinnings. This book offers a perspective of the global resurgence of religion in general and the revival of Islam in particular as crucial features of globalisation. Furthermore, the book deeply explores how Islamist groups strategically challenge religious authority, utilising social media and the internet to reshape their spheres of influence. By exploring these dynamics, the book aims to provide comprehensive insights into the interplay between Islamist strategies, digital platforms, and religious institutions within our interconnected world. Asif Mohiuddin is an Academic Officer in the Department of Islamic Studies, Faculty of Human Sciences, Sultan Idris Education University, Malaysia.
