

1. Record Nr.	UNINA9910764196603321
Autore	Geeraerts Dirk <1955->
Titolo	Lexical variation and change : a distributional semantic approach // Dirk Geeraerts [and six others] [[electronic resource]]
Pubbl/distr/stampa	Oxford : , : Oxford University Press, , 2024
ISBN	0-19-199599-1 0-19-889068-0
Descrizione fisica	1 online resource (337 pages)
Collana	Oxford scholarship online
Disciplina	417.2
Soggetti	Language and languages - Variation Dutch language - Variation Spanish language - Variation Lexicology Semantics Dutch language - Lexicology Spanish language - Lexicology Language Linguistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Also issued in print: 2024. "This is an open access publication, available online and distributed under the terms of a Creative Commons Attribution - Non Commercial - No Derivatives 4.0 International licence (CC BY-NC-ND 4.0)"--Title page verso.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover -- Titlepage -- Copyright -- Contents -- List of figures -- List of tables -- Introduction -- Part I Theoretical preliminaries -- 1 Lexical variation and the lexeme-lection-lect triangle -- 1.1 Choices of lexicological perspective -- 1.2 Semasiology, conceptual onomasiology, formal onomasiology -- 1.3 Onomasiological profiles and lectometry -- 1.4 The lexicon in language variation research -- 1.5 From cognitive linguistics to cognitive sociolinguistics -- The bottom line -- 2 Distributional semantics and the fog of meaning -- 2.1 From contexts to clusters -- 2.2 The diversity of distributional semantics -- 2.3 Sense determination and semantic indeterminacy -- 2.4 Semantics without

meaning -- The bottom line -- Part II Distributional methodology -- 3 Parameters and procedures for token-based distributional semantics -- 3.1 From text to vector space -- 3.2 Linguistically informed parameters -- 3.3 Statistical parameters -- 3.4 From vector space to token clouds -- 3.5 Overview of implemented settings -- The bottom line -- 4 Visual analytics for token-based distributional semantics -- 4.1 Dimensionality reduction for visualization -- 4.2 Selecting representative models -- 4.3 The NephoVis visualization tool -- 4.4 A ShinyApp extension for NephoVis -- The bottom line -- Part III Semasiological and onomasiological explorations -- 5 Making sense of distributional semantics -- 5.1 No single optimal solution -- 5.2 Types of information -- 5.3 Semantic heterogeneity -- 5.4 One cloud, one sense -- 5.5 Prototypical contexts -- 5.6 Semantic profiling -- The bottom line -- 6 The interplay of semasiology and onomasiology -- 6.1 Onomasiology and token clouds -- 6.2 Verbs of destruction in Dutch -- 6.3 Destruction in contemporary Dutch -- 6.4 Destruction across the centuries -- 6.5 The evolution of onomasiological sets -- The bottom line.

Part IV Lectometric methodology -- 7 Quantifying lectal structure and change -- 7.1 Measuring lectal distances -- 7.2 Standardization and informalization -- 7.3 Lexical diversity and lexical success -- The bottom line -- 8 Lectometry step by step -- 8.1 Selection of near-synonyms -- 8.2 Demarcation of the model space -- 8.3 Fine-tuning profiles -- 8.4 Selection of pruned models -- 8.5 Lectometric measures -- The bottom line -- Part V Lectometric explorations -- 9 Dimensions of standardization -- 9.1 Corpora and concepts -- 9.2 Modelling of token spaces and selection of profiles -- 9.3 Hierarchical standardization and destandardization -- 9.4 Formalization and informalization -- 9.5 Homogenization and dehomogenization -- 9.6 The evolution of Belgian and Netherlandic Dutch -- The bottom line -- 10 Pluricentricity from a quantitative point of view -- 10.1 Spanish as an international language -- 10.2 Corpus and concept selection -- 10.3 Distributional modelling -- 10.4 The impact of model retention -- 10.5 The impact of lexical fields -- 10.6 Pluricentricity and the plurality of models -- The bottom line -- Conclusions -- Software resources -- References -- Index.

---

## Sommario/riassunto

This volume introduces a systematic framework for understanding and investigating lexical variation, using a distributional semantics approach. It presents a comprehensive model of lexical and semantic variation, and uses case studies of Dutch and Spanish to illustrate both the advantages and disadvantages of a distributional methodology approach.
