The Political Economy of Bundling Socio-Technical Innovations to Transform Agri-Food Systems -- 9.1 The Imperative and Challenge of Agri-Food Systems Transformation -- 9.2 Why Socio-Technical Bundles? -- 9.3 Building Coalitions for Bundling: Insights from the Kaldor-Hicks Compensation Principle -- 9.4 The Roles of Institutions, Power, Information, and Trust -- 9.5 Some Empirical Illustrations -- 9.6 Conclusion -- References -- 10. Sustainable Food and Farming: When Public Perceptions Depart from Science -- 10.1 The Political Economy of Science Acceptance in Farming -- 10.2 Defining Sustainable Food -- 10.3 Case 1: "Green Revolution" Farming -- 10.4 Case 2: Industrial Farming -- 10.5 Case 3: Organic Food -- 10.6 Case 4: Genetically Modified Organisms (GMOS) -- 10.7 When Will Popular Resistance Block Uptake? -- 10.8 Will CRISPR Crops Become GMO 2.0? -- 10.9 Conclusion: Even Unpopular Science Reaches Farmers, Most of the Time -- References.

11. Enabling Positive Tipping Points in Public Support for Food System Transformation: The Case of Meat Consumption -- 11.1 Introduction -- 11.2 Existing Literature on Public Opinion on Sustainable Food Policy -- 11.3 Theoretical Argument -- 11.4 Methods Used in Survey-Embedded Experiments -- 11.5 Results -- 11.6 Combined Framing and Policy Design Effects -- 11.7 Discussion and Research Outlook -- 11.8 Conclusion -- References -- 12. Urban Food Systems Governance in Africa: Toward a Realistic Model for Transformation -- 12.1 Introduction -- 12.2 Governance of African Urban Systems and Food Systems -- 12.3 Food Governance in African Cities -- 12.4 Disrupting Food and Urban Governance-Misalignment in Global Processes -- 12.5 Emerging Global Urban Food Governance Processes -- 12.6 Combining Authorizing and Activating Environments -- 12.7 Conclusion -- References -- 13. The Political Economy of Food System Transformation in the European Union -- 13.1 Introduction -- 13.2 Food Systems Transition in the EU-State of Play -- 13.3 Political Economy Explanations for Change (or the Lack of It) -- 13.4 Opportunities to Catalyze the Transition -- References -- 14. Tracking Progress and Generating Accountability for Global Food System Commitments -- 14.1 Introduction -- 14.2 The Need for

Transformation, Commitments, and Accountability -- 14.3 Prior Work on Food Systems Accountability and Monitoring -- 14.4 Gaps in Food Systems Monitoring Work -- 14.5 Efforts to Fill These Gaps -- 14.6 Moving from Data and Information to Accountability -- 14.7 Conclusion -- References -- 15. Conclusions -- 15.1 Reconciling Trade-Offs Generated by Different Incentive Structures -- 15.2 Mixed Modes of Mobilization -- 15.3 Addressing Divergent Coalition Preferences through Strategic Policy Design -- 15.4 Policy Adaptation and Implementation.
15.5 Conclusions, Limitations, and Ways Forward -- References -- Index.

Sommario/riassunto

This volume analyses the political economy dynamics of food system transformation from an interdisciplinary perspective. Drawing on empirical data from a wide range of countries, the book touches on issues as varied as repurposing agricultural subsidies, biotechnology innovations, red meat consumption, and sugar-sweetened beverage taxes.
