| Sommario/riassunto | The European Union has a unique institutional framework aimed at promoting its values, pursuing its objectives and supporting its interests, its citizens and Member States, as well as ensuring the |

coherence, effectiveness and continuity of its policies and actions. The first Community institutions were created by the Treaty establishing the Coal and Steel Economic Community (from 1952, which established the coal and steel market), respectively the Treaty establishing the European Atomic Energy Community (from 1958, which established a generalized European common market). to the entire economy and to the field of atomic energy). Each treaty subsequent to the institutional treaties of the European Communities has contributed to the development of community institutions and the elimination of trade barriers between Member States with the aim of increasing economic prosperity and contributing to a "deeper union between the nations of Europe".

Controlling Performance and Financing -- 12. Preventing and Managing Crises -- Part IV: Meta-Tasks -- 13. Promoting Entrepreneurship -- 14. Simplifying and Creating Synergies -- 15. Final Remarks.
Sommario/riassunto	Complex companies are characterized by high turnover, a wide range of products and services, international operations, a significant number of employees, and decentralized production. In addition to their size

and diversity, complex companies are also characterized by high environmental dynamics and significant internal changes. Successfully managing a complex company presents a major challenge. This book begins by providing an overview of the most important tasks for both the supervisory and executive boards. It distinguishes three core tasks, six analysis and design tasks, and two meta-tasks. The individual tasks are then briefly described in a practical manner, including: - The importance of the task - The framework and description of the main subtasks - The responsibilities of the supervisory and executive boards

The primary audience for this book is members of supervisory and executive boards of complex companies. It can also be valuable for consultants. Finally, it is suitable as a teaching aid in master's programs, executive courses, and in-house programs of companies.

About the Author Prof. Dr. Rudolf Grünig holds a PhD from the University of Bern. He is a professor of management at the University of Fribourg, a board member, and a consultant for large and medium-sized Swiss companies. Additionally, he serves as a lecturer in strategy for executive courses and is an adjunct professor at the Swiss Finance Institute. From 2006 to 2009, he commanded an infantry brigade in the Swiss Army.
