

1. Record Nr.	UNINA9910765723703321
Titolo	What works in conservation 2017 // edited by William J. Sutherland [and three others]
Pubbl/distr/stampa	Cambridge, UK : , : Open Book Publishers, , 2017 ©2017
ISBN	1-78374-311-5 1-78374-310-7
Edizione	[New expanded and updated edition.]
Descrizione fisica	1 online resource (404 pages) : illustrations; digital file(s)
Collana	Conservation evidence
Disciplina	333.7
Soggetti	Biodiversity conservation - Government policy Nature conservation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previous edition: 2015.
Nota di contenuto	Introduction --1. Amphibian conservation --2. Bat conservation --3. Bird conservation --4. Farmland conservation --5. Forest conservation --6. Some aspects of control of freshwater invasive species --7. Some aspects of enhancing natural pest control --8. Enhancing soil fertility.
Sommario/riassunto	"Is leaving headlands in fields unsprayed beneficial for wildlife? Is paying farmers to cover the costs of bird conservation measures effective? Is using prescribed fire beneficial for young trees in forests? Does translocating frogs benefit wild populations? Is providing artificial roost structures for bats beneficial? What Works in Conservation has been created to provide practitioners with answers to these and many other questions about practical conservation. This book provides an assessment of the effectiveness of 763 conservation interventions based on summarized scientific evidence. Chapters cover the practical global conservation of amphibians, bats, birds and forests, conservation of European farmland biodiversity and some aspects of enhancing natural pest control, enhancing soil fertility and control of freshwater invasive species. It contains key results from the summarized evidence for each conservation intervention and an assessment of the effectiveness of each by international expert panels. The accompanying website www.conservationevidence.com describes

each of the studies individually, and provides full references. This is the second edition of *What Works in Conservation*, which is revised on an annual basis. It will also be available online as a free-to-download PDF at www.conservationevidence.com."--Publisher's website.
