Chapter 8: Sustainability of what?: The struggles of poor Mayan households with young breadwinners towards a better life in the peri-urban area of Merida, Yucatan, Mexico

Sommario/riassunto	One of the major challenges of urban development has been reconciling the way cities develop with the mounting evidence of resource depletion and the negative environmental impacts of predominantly urban-based modes of production and consumption. This book aims to re-politicise the relationship between urban development, sustainability and justice, and to explore the tensions emerging under real circumstances, as well as their potential for transformative change.For some, cities are the root of all that is unsustainable, while for others cities provide unique opportunities for sustainability-o
