Titolo	Public access ICT across cultures : diversifying participation in the network society // edited by Francisco J. Proenza
Pubbl/distr/stampa	Cambridge, Massachusetts : , : The MIT Press Ottawa : , : International Development Research Centre, , [2015]
ISBN	1-55250-569-3
Descrizione fisica	1 online resource (xiv, 476 pages)
Altri autori (Persone)	ProenzaFrancisco J
Disciplina	303.48/33
Soggetti	Information society - Economic aspects Information technology - Developing countries Digital divide - Developing countries Information technology - Economic aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Shared public access to computers and the Internet in developing countries is often hailed as an effective, low-cost way to share the benefits of digital technology. Yet research on the economic and social effects of public access to computers is lacking. This volume offers the first systematic assessment of the impact of shared public access in the developing world, with findings from ten countries in South America, Asia, and Africa. It provides evidence that the benefits of diversified participation in digital society go beyond providing access to technology. Public access venues -- most often Internet cafs in cities and state-run telecenters in rural areas -- are places for learning, sharing, working, empowerment and finding opportunities. The book documents the impact of public access on individuals, on society and networks, and on women. Chapters report findings and examine policy implications of research on such topics as users' perceptions of the benefits of Internet caf use in Jordan; ICT job training in Rwanda; understanding user motivations and risk factors for overuse and Internet addiction in China; the effect of technology use on social inclusion among low-income urban youth in Argentina; productive uses

of technologies by grassroots organizations in Peru; use of technology by migrant ethnic minority Burmese women in Thailand to maintain ties with their culture and their family and friends; and women's limited access to the most ubiquitous type of venue, cybercafs, in practically all countries studied -- and quite severely in some places, e.g. Uttar Pradesh, India.
