Sommario/riassunto	Set within the context of UK devolution and constitutional change, People, Places and Policy offers important and interesting insights into 'place-making' and 'locality-making' in contemporary Wales. Combining policy research with policy-maker and stakeholder interviews at various spatial scales (local, regional, national), it

examines the historical processes and working practices that have produced the complex political geography of Wales. This book looks at the economic, social and political geographies of Wales, which in the context of devolution and public service governance are hotly debated.
