

1. Record Nr.	UNINA9910765877503321
Titolo	Visualisierung sprachlicher Daten : Visual Linguistics - Praxis - Tools / / Herausgegeben von Noah Bubenhofer und Marc Kupietz
Pubbl/distr/stampa	Heidelberg : , : Heidelberg University Publishing (heiUP), , [2018] ©2018
Descrizione fisica	1 online resource (330 pages) : illustrations
Disciplina	372.6
Soggetti	Language arts Computational linguistics Visual analytics
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Visualizations play an important role in the scientific research process. They serve to illustrate the knowledge gained, but also as a tool to gain knowledge. Such visualizations are also important in linguistics. For example in the form of maps, tree graphs and word nets. In corpus linguistics, explorative visualizations are often a way to make the data accessible and interpretable. The book reflects on the theoretical basics of scientific visualizations in linguistics, shows practical examples and also introduces visualization tools.
