4. Record Nr.	UNINA9910350355303321
Autore	Noble Keith
Titolo	Agriculture and Resilience in Australia's North : A Lived Experience // by Keith Noble, Tania Dennis, Sarah Larkins
Pubbl/distr/stampa	Singapore : , : Springer Singapore : , : Imprint : Springer, , 2019
ISBN	981-13-8355-3
Edizione	[1st ed. 2019.]
Descrizione fisica	1 online resource (229 pages)
Disciplina	630
Soggetti	Agriculture Sustainable development Industrial management—Environmental aspects Social service Sustainable Development Sustainability Management Social Work and Community Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Part 1: North Australian Theory and Realities -- Chapter 1. Agriculture as a Human Endeavour -- Chapter 2: Resilience Discourse and Adaption Strategies -- Chapter 3: Agricultural Development in Northern Australia -- Chapter 4: Framing Northern Australian Agriculture's Future -- Chapter 5: Why, and How, to Consider the Resilience of Individuals? -- Part 2: Lived Experience - Why People, Place, and Services Matter -- Chapter 6: The Resilience Strategies of Individuals -- Chapter 7: The Influence and Importance of the Built Environment -- Chapter 8: Health as a Building Block for Resilience -- Part 3. Discussion and Conclusions -- Chapter 9: Bringing it together - the Thread of Fairness -- Chapter 10: A Fair Go, a Fair Future.
Sommario/riassunto	This book examines the mechanisms and strategies farmers in North Australia adopt to manage the setbacks and challenges they face. This social research is based on farmers' experiences, but also draws on the author's own experience after his tropical fruit farm was destroyed by two Category 5 cyclones in five years. Through historical analysis, the book compares historic and contemporary aspirations for northern

development, and discusses the influence of the built environment on individuals as well as access to health and other social services. Exploring the implications of individual resilience strategies for policy development within the broader context of northern development and evolving environmental governance, the book also highlights the fact that this is occurring in a new geological epoch – the Anthropocene. The book will provide a unique perspective and understanding to government, individuals and industries interested in northern Australia and its relationship to the world.

Livello bibliografico	Monografia
Sommario/riassunto	Mobility - the movements of people, things, and ideas, as well as their associated cultural meanings - has been a key factor in shaping Canadians' perceptions of and interactions with their country. Approaching the burgeoning field of environmental history in Canada through the lens of mobility reveals some of the distinctive ways in which Canadians have come to terms with the country's climate and landscape. Spanning Canada's diverse regions, throughout its history, from the closing of the age of sail to the contemporary era of just-on-time delivery, Moving Natures: Mobility and the Environment in Canadian History examines a wide range of topics, from the impact of seasonal climactic conditions on different transportation modes, to the

environmental consequences of building mobility corridors and pathways, to the relationship between changing forms of mobility with tourism and other recreational activities. Contributors make use of traditional archival sources, as well as historical geographic information systems (HGIS), qualitative and quantitative analysis, and critical theory. This thought-provoking collection divides the intersection of environmental and mobility history into two approaches. The chapters in the first section deal primarily with the construction and productive use of mobility technologies and infrastructure, as well as their environmental constraints and consequences. The chapters in the second section focus on consumers' uses of those vehicles and pathways: on pleasure travel, tourism, and recreational mobility. Together, they highlight three quintessentially Canadian themes: seasonality, links between mobility and natural resource development, and urbanites' experiences of the environment through mobility. With Contributions By: Judy Burns, Jim Clifford, Ken Cruikshank, Jessica Dunkin, Elizabeth L. Jewett, Don Lafreniere, Elsa Lam, Maude-Emmanuelle Lambert, J.I. Little, Daniel Macfarlane, Merle Massie, Tor H. Oiamo, Joy Parr, Thomas Peace, and Andrew Watson.
