	Descrizione fisica	1 online resource (451 pages) : illustrations
	Disciplina	621.3981
	Soggetti	Computer network architectures 5G mobile communication systems
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Includes index.

Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Market Drivers / Reza Arefi, Sasha Sirotkin -- 5G System Overview / Sebastian Speicher, Sasha Sirotkin, Sudeep Palat, Alexei Davydov -- NG-RAN Architecture / Colby Harper, Sasha Sirotkin -- NG-RAN Evolution -- Enabling Technologies -- NG-RAN Deployment Considerations / Andreas Neubacher, Vishwanath Ramamurthi.
Sommario/riassunto	Written by an industry insider with state of the art research at their fingertips, this book describes the Radio Access Network (RAN) architecture, starting with currently deployed 4G, followed by the description of 5G requirements and why re-thinking of the RAN architecture is needed to support these. Based on these considerations, it explains how 5G network architecture, which is currently being defined, is likely to evolve. The aim is not merely to cover relevant standards and technologies as a purely academic exercise (although a significant part of the book will be dedicated to these), but to augment these by practical deployment, to illustrate why the RAN architecture is changing and where it is going. With 5G deployments on the horizon, there is a desire within companies to both re-think the RAN architecture and to change the proprietary nature of the RAN. Correspondingly, there is increased interest in academia, standards bodies and commercial entities involved in the area.

Sommario/riassunto	This book sketches an institutional political economy framework to discuss the interaction between development and foreign policy in the global South with reference to Turkey. The authors argue that although the developmental state framework has commonly been employed to explore domestic economic development processes without analytically focusing on the foreign policy dimension, developmental state

institutions are highly relevant in the creation and pursuit of a development-oriented foreign policy at a time of growing uncertainty marred by geopolitical and geoeconomic tensions. The book develops a two-level 'Regime Coherence Framework' to account for the domestic and international dimensions of development-oriented foreign policy. The main argument posits that the development regime in Turkey and associated foreign policies lack coherence, due to weak institutional complementarities between economic governance, state-business relations, and financial statecraft at the domestic-external nexus. Mustafa Kutlay is Senior Lecturer in the Department of International Politics at City, University of London, UK. He works on comparative politics, politics of development, emerging powers, Turkish political economy, and the global South. H. Emrah Karaouz is Assistant Professor in the International Relations department at Kadir Has University, Turkey. His current research focuses on political economy of development, international/comparative political economy, Turkish political economy, and political economy of innovation.
