

1. Record Nr.	UNINA9910766895703321
Titolo	Innovative Approaches in Knee Arthroscopy // Vikram Arun Mhaskar and J. Maheshwari, editors
Pubbl/distr/stampa	Singapore : , : Springer, , [2023] ©2023
ISBN	981-9943-78-7
Edizione	[First edition.]
Descrizione fisica	1 online resource (311 pages)
Disciplina	617.4720597
Soggetti	Arthroscopy Knee - Endoscopic surgery
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Part 1 Basic Arthroscopy -- Portals front to back -- Arthroscopic removal of a loose body removal when your grasper breaks -- Arthroscopic MCL pie crusting -- Part 2 Osteochondral Lesion -- Arthroscopic Fixation of an Osteochondral Fragment: multiple pins technique -- Arthroscopic Suture bridge fixation of an osteochondral Fragment -- Part 3 Meniscus -- Arthroscopic Meniscectomy simplified with 3 portals -- Arthroscopic true all inside meniscus repair using an antegrade suture passer -- Arthroscopic inside out meniscus repair using a single lumen cannula -- Outside in meniscus repair the suture shuttle technique -- Single portal RAMP repair -- Arthroscopic meniscus root repair with pull out tapes -- Two portal RAMP repair using an antegrade suture passer -- Part 4 ACL -- Arthroscopic primary ACL repair with internal bracing -- Arthroscopic ACL reconstruction plus repair of the stump -- Arthroscopic stump preservation ACL reconstruction -- Arthroscopic bony femoral avulsion fixation -- Arthroscopic ACL avulsion fixation with an adjustable suspension device -- Arthroscopic ACL avulsion suture bridge fixation -- Part 5 PCL -- Arthroscopic PCL Reconstruction : the transseptal technique -- Arthroscopic all inside PCL reconstruction: Avoiding the killer turn Arthroscopic PCL avulsion fixation: Trapdoor trans-septal technique -- Part 6 Miscellanous -- Arthroscopic Stiff knee release: The 360 degree technique -- Ultrasound guided arthroscopic popliteal

cyst excision -- Arthroscopic popliteus tendon repair -- Arthroscopic PLC reconstruction -- Implantless fixation techniques -- Innovative anesthetic techniques for knee arthroscopy.

Sommario/riassunto

This book covers innovative techniques of doing standard and advanced knee arthroscopic procedures. The techniques described are meant to simplify and improve the accuracy of the procedure based on experience and published innovative and original techniques. Arthroscopic surgery is a technical operation that takes time to master. There have been immense advances in operative arthroscopy with the advent of modern surgical instruments and implants. Existing books focused mainly on the theoretical parts with some operative matter. However, as a surgeon gets experienced, she/he identifies a fallacy in a standardised technique and improvises on it to make it simpler or doable with available resources. This is very important as many centres around the world may not have all the equipment required for a particular procedure and may not be aware that there is a variation to doing the same procedure that is being done by another experienced surgeon. Potential complications of doing the technique and how to avoid them have been discussed. The inventory to do the technique has also been provided. This book will assist arthroscopic surgeons of the knee as well as surgeons intending to learn arthroscopy and advance their skills in improving their repertoire of arthroscopic procedures. World-renowned surgeons have contributed to this volume to help everyone to learn from their experience.
