1. Record Nr.   UNINA9910767508003321

   Titolo   Foundations of Augmented Cognition : Third International Conference,
                       FAC 2007, Held as Part of HCI International 2007, Beijing, China, July
                       22-27, 2007, Proceedings / / edited by Dylan D. Schmorrow, Leah M.
                       Reeves

   Pubbl/distr/stampa Berlin, Heidelberg : , : Springer Berlin Heidelberg : , : Imprint : Springer,
                       , 2007

   ISBN   3-540-73216-0

   Edizione   [1st ed. 2007.]

   Descrizione fisica 1 online resource (XIX, 452 p.)

   Collana   Lecture Notes in Artificial Intelligence, , 2945-9141 ; ; 4565

   Disciplina   004.019

   Soggetti   Artificial intelligence
                       Medical informatics
                       Computer vision
                       Application software
                       Data mining
                       Database management
                       Artificial Intelligence
                       Health Informatics
                       Computer Vision
                       Computer and Information Systems Applications
                       Data Mining and Knowledge Discovery
                       Database Management

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Bibliographic Level Mode of Issuance: Monograph

   Nota di bibliografia   Includes bibliographical references and index.

   Nota di contenuto   I: Augmented Cognition Methods and Techniques -- Development of
                       Gauges for the QinetiQ Cognition Monitor -- Quantitative EEG Changes
                       Under Continuous Wakefulness and with Fatigue Countermeasures:
                       Implications for Sustaining Aviator Performance -- Exploring
                       Calibration Techniques for Functional Near-Infrared Imaging (fNIR)
                       Controlled Brain-Computer Interfaces -- A Sensor Positioning System
                       for Functional Near-Infrared Neuroimaging -- Ad-Hoc Wireless Body
                       Area Network for Augmented Cognition Sensors -- Integrating

Sommario/riassunto   The 12th International Conference on Human-Computer Interaction,

HCI Inter- tional 2007, was held in Beijing, P.R. China, 22-27 July 2007, jointly with the Symposium on Human Interface (Japan) 2007, the 7th International Conference on Engineering Psychology and Cognitive Ergonomics, the 4th International Conference on Universal Access in Human-Computer Interaction, the 2nd International Conf- ence on Virtual Reality, the 2nd International Conference on Usability and Inter- tionalization, the 2nd International Conference on Online Communities and Social Computing, the 3rd International Conference on Augmented Cognition, and the 1st International Conference on Digital Human Modeling. A total of 3403 individuals from academia, research institutes, industry and g- ernmental agencies from 76 countries submitted contributions, and 1681 papers, judged to be of high scientific quality, were included in the program. These papers address the latest research and development efforts and highlightthe human aspects of design and use of computing systems. The papers accepted for presentation th- oughly cover the entire field of Human-Computer Interaction, addressing major - vances in knowledge and effective use of computers in a variety of application areas. This volume, edited by Dylan D. Schmorrow and Leah M. Reeves, contains papers in the thematic area of Augmented Cognition, addressing the following major topics: • Augmented Cognition Methods and Techniques • Applications of Augmented Cognition.
