

1. Record Nr.	UNINA9910767508103321
Titolo	25 years of model checking : history, achievements, perspectives // Orna Grumberg, Helmut Veith (eds.)
Pubbl/distr/stampa	Berlin, : Springer, 2008
ISBN	3-540-69850-7
Edizione	[1st ed. 2008.]
Descrizione fisica	1 online resource (VII, 234 p.)
Collana	Lecture notes in computer science, , 0302-9743 ; ; 5000 LNCS sublibrary. SL 1, Theoretical computer science and general issues
Classificazione	DAT 003f DAT 325f DAT 540f SS 4800
Altri autori (Persone)	GrumbergOrna VeithHelmut
Disciplina	005.131
Soggetti	Computer systems - Verification
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"This volume presents a collection of invited papers based on talks at the symposium "25 Years of Model Checking (25MC)"--Pref.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The Birth of Model Checking -- The Beginning of Model Checking: A Personal Perspective -- Verification Technology Transfer -- New Challenges in Model Checking -- A Retrospective on Mur? -- Model Checking: From Tools to Theory -- Value Iteration -- Fifteen Years of Formal Property Verification in Intel -- A View from the Engine Room: Computational Support for Symbolic Model Checking -- From Church and Prior to PSL -- On the Merits of Temporal Testers -- DESIGN AND SYNTHESIS OF SYNCHRONIZATION SKELETONS USING BRANCHING TIME TEMPORAL LOGIC -- SPECIFICATION AND VERIFICATION OF CONCURRENT SYSTEMS IN CESAR.
Sommario/riassunto	Model checking technology is among the foremost applications of logic to computer science and computer engineering. The model checking community has achieved many breakthroughs, bridging the gap between theoretical computer science and hardware and software engineering, and it is reaching out to new challenging areas such as system biology and hybrid systems. Model checking is extensively used in the hardware industry and has also been applied to the verification

of many types of software. Model checking has been introduced into computer science and electrical engineering curricula at universities worldwide and has become a universal tool for the analysis of systems. This Festschrift volume, published in celebration of the 25th Anniversary of Model Checking, includes a collection of 11 invited papers based on talks at the symposium "25 Years of Model Checking", 25MC, which was part of the 18th International Conference on Computer Aided Verification (CAV 2006), which in turn was part of the Federated Logic Conference (FLoC 2006) held in Seattle, WA, USA, in August 2006. Model checking is currently attracting considerable attention beyond the core technical community, and the ACM Turing Award 2007 was given in recognition of the paradigm-shifting work on this topic initiated a quarter century ago. Here we honor that achievement with the inclusion of facsimile reprints of the visionary papers on model checking by Edmund Clarke and Allen Emerson, and by Jean-Pierre Queille and Joseph Sifakis.
