Sommario/riassunto	The book provides new perspectives from leading researchers accentuating and examining the central role of the built environment in conceiving and implementing multifaceted solutions for the complex challenges of creating resilient communities, revealing critical potentials for architecture and design to contribute in more informed and long-term ways to the urgent transition of our society. The volume offers a compilation of peer-reviewed papers that uniquely connects knowledge and criticality broadly across practice and academia; from new technologies, theories and methods to community engaged practice on many scales, and more.
