

1. Record Nr.	UNINA9910767561103321
Autore	Vandycke Nancy <1969->
Titolo	Sustainable Mobility in a Fast-Changing World : From Concept to Action // by Nancy Vandycke, José M. Viegas
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Palgrave Macmillan, , 2022
ISBN	9783031089619 3031089618
Edizione	[1st ed. 2022.]
Descrizione fisica	1 online resource (188 pages)
Collana	Sustainable Development Goals Series, , 2523-3092
Disciplina	605 388.04
Soggetti	Transportation Sustainability Economic policy Transportation Economics Economic Policy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Part I. The Need and Urgency for a New Approach -- 1. Key Trends Shaping the Future of Mobility -- 2. From the Sustainable Development Goals to Sustainable Mobility -- 3. The Power of Data and New Technologies -- 4. A New Governance Paradigm -- 5. Toward More Equitable and Inclusive Transport -- Part II. A New Approach to Transport Policy Making -- 6. Modern Transportation Systems and Risks -- 7. Responding to Changing Dynamics with a Path Forward: Sustainable Mobility for All -- 8. Defining the Playing Field: The Global Tracking Framework -- 9. Building a Global Policy Knowledge Collection: The Catalogue of Policy Measures -- 10. Priming for Coherent Country Action: Prototype and Country Action Plans -- 11. From Methodology to Implementation: The Case of South Africa -- 12. The Next Frontier of Mobility.
Sommario/riassunto	"True to its roots, Sustainable Mobility in a Fast-Changing World takes readers through the dynamics shaping our world today and in the future, and what can be done to help ensure a brighter future for all

through sustainable mobility.” —Sustainable Mobility for All Steering Committee “We all contribute to unsustainable mobility and this new systematic guidance provides a clear framework within which to compare, debate and decide on effective action. This book will help all countries facilitate progress towards sustainable mobility.” —David Banister, Professor Emeritus of Transport Studies, University of Oxford, UK “The authors’ expertise in the field is a great resource and solid foundation for the development of a much-needed new approach to transport, which highlights the importance of multi-stakeholder partnerships between and across local, national governments, and other sectors.” —Mauricio Rodas Espinel, former Mayor of Quito Our world is changing fast. Countries’ transport systems, which have long been shaped by project-by-project considerations, must help achieve higher-level goals for the well-being of mankind, as embodied by the UN’s Sustainable Development Goals and the Paris Climate Agreement. New forces impose greater effectiveness in the way public choices are made, such as making better use of data and technologies, adopting a more inclusive and participatory approach to decision making, and addressing social concerns about equity. Transport practitioners and country decision-makers have been looking for structured and coherent guidance about ways to adjust to these new dynamics and change the trajectory of transport system. This book examines the rationale for and details an innovative approach for public decision-making to expedite the pace to sustainable mobility. Nancy Vandycke designs and manages sustainable infrastructure initiatives at the World Bank, is author of the award-winning Sustainable Mobility for All program and has a PhD in Economics from the London School of Economics, UK. José M. Viegas is Professor Emeritus at the University of Lisbon, Portugal and methodological coordinator of the Global Roadmap of Action.
