Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Long description: Mehr Europa oder kein Europa? In der Europäischen Union entscheidet sich das Schicksal von über 500 Millionen Menschen. Die politische und wirtschaftliche Stabilität eines ganzen Kontinents scheint mittlerweile vom Erfolg der Europäischen Währungsunion abzuhängen. Die Identität und das Selbstbewusstsein der Völker Europas sind zwar nicht vornehmlich in Geld auszudrücken. Der Wille zum weiteren friedlichen Aufbau Europas durch Solidarität und Solidität sowie die Sicherung des allgemeinen Wohlstands durch fairen Wettbewerb kann durch den Euro aber dann gestärkt und gefördert werden, wenn die Folgen politischer Fehlentscheidungen beseitigt sind. Der Autor beweist, dass es allerhöchste Zeit ist. Europa kann und wird scheitern, wenn seine Völker zulassen, dass inkompetente Politiker, Teile von selbsternannten und selbstsüchtigen Eliten, asoziale Wirtschaftsführer und unregulierte Finanzmärkte eine Allianz gegen die vitalen Interessen der Menschen eines ganzen Kontinents bilden. Wolfgang Hetzer zeigt, dass es höchste Zeit ist, die Folgen von politischen Fehlentscheidungen zu korrigieren. Er identifiziert die Verantwortlichen und beschreibt die Ursachen, die spätestens seit Mai 2010 Europa teilweise bis an den Abgrund geführt hat. Die Zukunft Europas hängt entscheidend davon ab, dass sich hinreichend

qualifizierte Persönlichkeiten für die Steigerung des europäischen Gemeinwohls einsetzen. Andernfalls ist der Vertrauensverlust in den Sachverstand der Wirtschaft und die Führungsfähigkeit der Politik nicht mehr auszugleichen. Es wächst dann die Gefahr, dass sich in Europa wieder einmal die Frage der Vorherrschaft nationaler Interessen stellt. Dem darauf regelmäßig folgenden Spektakel der Unvernunft will der Autor mit diesem Buch entgegenwirken.

Emerging Trends and Insights in Research Management and Administration / Mariko Yang-Yoshihara, Simon Kerridge, and Susi Poli.

Sommario/riassunto

The ebook edition of this title is Open Access and freely available to read online. Over past decades, scholars and practitioners around the world observed an emergence of professionals, research managers and administrators (RMAs) who play an essential role in the advancement of academic research. RMAs have extensive knowledge of the research ecosystem, including funding opportunities, proposals, budgeting and pricing, ethics, open research, project management, finance, negotiation, strategy, systems, and assessment. Until now, limited efforts have been made to investigate RMAs in a cross-regional, comparative manner, or to understand the recent surge of the profession in a larger policy context. Addressing this gap, an international group of experts share diverse perspectives to provide a comprehensive account of RMA as a profession, offer an analytical framework to understand their role in higher education and academic science. Covering countries in Africa, Australasia, East Asia and India, Western Europe, Central and Eastern Europe, the Middle East, North America, and South America, the work provides trans-cultural coverage of the profession. Drawing on theories from related fields, it also provides insights and understanding of RMAs as a social phenomenon. The Emerald Handbook of Research Management and Administration Around the World is the most comprehensive book about practitioners working in research management and administration. The book

provides basic knowledge for students and professionals considering a career in this field, and serves as reference material for policymakers as well as academic researchers. By presenting evidence-based observations from around the world and discussing global trends, this text promotes social awareness of RMAs, shares state-of-the-art knowledge on the profession, and offers insights into the future of academic research.
